Buffalo Nickels

Past Performance and Future Potential

By Kathleen Duncan

Over the past decade and a half, against the current of a downward market, Buffalo Nickels have buoyed in value. Most noticeably, even in the relatively bellwether years of 2001 and 2002, they have experienced extraordinary gains. Still, many questions remain. Which dates have appreciated, which haven't, and why? Which dates are positioned to increase from here? Finally, is the series **overvalued?**

First a little background. The design was created by James Earle Fraser, one of America's leading sculptors, and perhaps most famous for his monument, *"The End of the Trail,"* in which a worn out Indian and his horse seemingly represent the exhausted resources of the Native Americans of that time.

Over 1.2 Billion Buffalo Nickels were Minted at three Mints: Philadelphia, San Francisco, and Denver. The obverse portrays the portrait of a Native American warrior facing right. The first variety (Type 1) depicts a bison on a raised mound on the coin's reverse. Unfortunately, the words "FIVE CENTS" were quickly showing wear on this design, so within a few months the Type 2 variety was created in which the mound was removed to provide a recessed area for those words.

The Circulation Strikes

Circulation strikes were Minted from 1913 through 1938. In most years, they were created at all three active Mints, but none at all were struck in 1922, 1932 or 1933. Additionally, Denver didn't produce any for the years 1921, 1923, 1930 and 1931. The Philadelphia Mint wasn't striking them in 1931 or the final year, 1938. And San Francisco didn't create any in 1934 or 1938 (unless you count the 1938-D/S).

Strike has always been a problem with this series, and many dates from 1918 to 1934 are nearly unobtainable as well struck examples. Although many of the Key dates hail from San Francisco, it is the often the Denver issues that are the weakest in this department, and both the Denver and San Francisco issues from the late teens and twenties show weakness in the central details. While the most difficult coins to obtain are the overdates (1914/3 and 1918/7-D) and the 1916 Double Die, the other keys are the 1920-S, 1925-S, 1926-S, 1927-S. These are dates that may only surface in MS65 condition once a year. There are many other issues, however, that pose a challenge as well: 1918-S, 19-D, 19-S, 20-D, 21-S, 23-S, 24-D 24-S, 25-D, 27-D, 28-S, and the 37-D 3 Leg.

For the purposes of this analysis, we are going to eliminate the 1914/3 (on which it is difficult to find pricing information), the 1916 Double Die, and the 1918/7-D, since they are not only nearly impossible to acquire, but also are price prohibitive to most collectors. This leaves us with a 66 piece set that's challenging enough.

Since it is difficult to accurately report retail pricing figures, we have provided *Greysheet* Bids, which represent wholesale prices for accurately graded coins — certified or raw. When reporting on grades above 65, *Bluesheet* sight-unseen wholesale Bids were used, since the *Greysheet* doesn't list Buffalo Nickel sight-seen Bids in those grades. 1989 was chosen because it represents the high point for the overall coin market.

PCGS populations are shown throughout this article, since PCGS has graded a much higher percentage of high-grade Buffaloes than NGC, and since pricing is somewhat different between the services, the inclusion of NGC data may have been somewhat confusing.

If you were to have assembled a complete set of MS65 examples at the height of the 1989 boom, it would have set you back roughly $140,000. Today the same set would run you about $250,000. This is almost an 80% increase in value. And this does not take into account the probability that a number of the coins graded MS65 in 1989 and earlier could grade higher today, which would add considerably more to a collection's value. Not bad, considering the coin market as a whole has drastically declined in value during the same time period.

What the above statistic doesn't reveal is that the appreciation is heavily weighted towards rarity. Between 1989 and today, there have been just 28 dates in MS65 condition that have risen in price, but 38 that have declined. For the most part, the best performers have the absolute lowest populations. Indeed, the top performers have been the Key dates. This should not come as a surprise, since the scarcest dates from several series have posted stellar profits, while the common ones have simultaneously lost value. As many veteran coin collectors realize, buying the rarest and highest quality is usually the wisest investment.

The Winners: (see Chart A)

1917-S, 18-S, 19, 19-D, 19-S, 20, 20-D, 20-S, 21-S, 23, 23-S, 24, 24-D, 24-S, 25, 25-D, 25-S, 26-D, 26-S, 27-D, 27-S, 28-S, 29-D, 30, 31-S, 36, 37-D 3 Leg and 38-D/S.

The Lowest Populations MS65 and higher grades (53 or less at PCGS): 1918-S, 19-D, 19-S, 20-D, 20-S, 21-S, 23-S, 24-D 24-S, 25-D, 25-S, 26-S, 27-D, 27-S, 28-S, 37-D 3 Leg.

With PCGS being in its 16th year and NGC in its 15th, the relative rarity of various dates has become increasingly apparent. The Population Report (PCGS) and Census Report (NGC) have made relative rarity easier to ascertain but are not without their flaws. From the beginning of third-party grading, many coins (especially the rarest) have been submitted multiple times. While some grading labels get returned, many do not, resulting in exaggerated population figures. However inaccurate, these reports are still extremely useful tools. While the series does appear to be slightly overvalued as a whole, below are some of the dates that presently offer good value:

1913-D T-2 MS66—With just 27 examples graded, this coin seems reasonable—especially compared with the 13-S T-2 MS66 which has a population of 21, but is double the *Bluesheet* Bid ($2,520 vs. $5,500).

1914-S MS65—There are only 58 MS65s, 20 MS66s and none higher. A $1,650 MS65 Bid seems too cheap in relation to most of the issues.

1916-D MS65-MS66—There are only 59 MS65s and just 6 MS66s. MS65s should be valued higher than $1,675. The 1917-D and the 1926-D both have higher populations, but much higher Bids. And, while the *Bluesheet* shows $6,000 in MS66, this coin could easily bring closer to five-figures, sight-seen.

1916-S MS65—Like the 1916-D, this issue has a very similar population to the 1917-S, yet its Bid is roughly half.

Overall	4,300	5,455	6,080	6,640	+54%	+22%	+9%

1918 MS66— With the population at just 20, this coin should be valued higher than $2,580.

1924 MS65-MS66—This is perhaps my favorite value play in this series. With a MS65 population of just 124 yet bid at only $640 it has plenty of room to appreciate. And the scant 25 MS66s are Bid sight-unseen at a paltry $1,700.

I still believe the Key dates will continue to outperform the series as a whole. Expect to pay fairly sizable premiums to *Greysheet* Bid to obtain good ones. Here is a smattering of recent auction prices realized from a

CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*); both report the national Dealer-to-Dealer, wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. TheCDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

September 2002 sale for PCGS MS65s: 1920-S $32,500; 1925-S $43,700; 1927-S $21,850.

Besides population reports, you can browse the PCGS Registry to examine relative rarity. In this program, the current finest as well as all time finest sets are ranked in many series, giving collectors the opportunity to compare their collections grade-wise against others, past and present. The program often eliminates varieties, since not everyone collects them. For example, the Registry only ranks participating Buffalo collections on the basis of 64 issues, eliminating the 1938-D/S and the 1937-D 3 Leg included in this study. (The popularity of the Registry program will most likely have a negative effect on the values of those two dates. As the 3 Leg is also one of the most expensive pieces in the series, this fact should not be overlooked.)

Another component of the Registry Program is the weighting of the dates based on their relative rarity. Individual dates are weighted from 1-9 points depending upon their populations. The three rarest dates (26-S, 25-S and 27-S) are all weighted a 9. The most common dates are weighted 1. This should affect pricing by creating value equality between dates with similar populations—although this has by and large already occurred.

The Proofs

Proof coins were struck from 1913 through 1916 and again in 1936 and 1937. (A few Proof 1917 examples also exist, but these were not publicly distributed.) Mintages range from 600 for the 1916 to 5,769 for the final issue of 1937.

The Proofs from 1913-1917 are of a Matte finish, exhibiting a slight granularity and frosted appearance. For the most part, this style was not favored by collectors, and mintages declined steadily due to weak demand. Actually, even the first year's mintage was relatively low at just 1,520 for the 1913 Type 1, and a similar 1,514 for the Type 2.

After a twenty year hiatus, sales of Proofs resumed in 1936 with the more traditional Proof style, which was much more favorably received by the public. There are actually two different Proof varieties in 1936: The Type 1, or Satin finish, which is vibrant and semi-prooflike; and the Type 2, or Brilliant finish, which is reflective and more proof-like in appearance. The 1937 also features the Brilliant finish.

Since a set of Proof Buffaloes (1913-37) comprises just eight coins, and all dates are readily available, it is a very popular one to complete. None of the dates are terribly difficult to locate in PR65, and even PR66 examples are fairly plentiful. Acquiring even a PR67 and finer set is possible as long as your pocketbook allows. This challenge, however, has become much more formidable in the past two years, as prices have skyrocketed. (See Chart B)

In just two years, the 1936 Type 1 and Type 2 and the 1937 have increased as a group 94% in PR65, 110% in PR66, and 92% in PR67. In fact, the 1936-1942 Mercury Dimes and Walkers have experienced nearly identical dramatic gains. While these certainly were too cheap two years ago, they seem more than fairly priced today.

The Matte Proof issues of 1913-1916 have seen more modest increases. (See Chart C) (Neither the *Bluesheet* nor the *Greysheet* covered Matte Proofs in 1989, so we've taken figures from ten years ago instead.) I still love the value here. These dates have mintages and populations far lower than the later date Proofs and yet they cost just a little more. There are 548 1937s in PR65, and it is Bid at $1,125. The 1915 has just 113 examples graded in PR65, yet is Bid just $1,290. I know which one I d prefer to own.

Certain coins are "expensive" for good reason. The Buffalo Nickel series has been perennially popular and is undoubtedly one of American numismatics' best designs. Beauty is always in high demand, seemingly more so than rarity. Even the Classic Rarities of less beloved designs (Liberty Nickels, Three Cent Nickels, Seated Liberty coinage, etc.) sell for less than the mid-range dates in the most beautiful designs (Walking Liberty Half Dollars, Standing Liberty Quarters and Buffalo Nickels). So we shouldn t rule out collecting this series simply because it has experienced stunning gains. However, it makes good sense to avoid those issues like the 1936 and 1937 Proofs whose prices seem presently overvalued.

Chart A Prices for 1989 taken from the November 1989 *Monthly Summary*. Prices from 2001 are taken from the November 9 *CDN Monthly Supplement*. Prices from 2002 from the November CDN Monthly Supplement.

Chart B In 1989 the *Greysheet* did not distinguish between 1936 Satin and Brilliant Proofs. PR66 and PR67 Bids are PCGS Bids from CCDN dates as shown.

Plan to be a part of our fabulous 2003 Auction Season!

John Pack

Rick Bagg

Celebrating 50 years in Numismatics!

We are pleased to announce that we are now accepting consignments for our 2003 auction season. Bowers and Merena Galleries' sales are always the most highly anticipated in the numismatic community. Let our success be your success! Over the years we have sold hundreds of millions of dollars worth of coins, paper money, and other numismatic items for tens of thousands of consignors, ranging from museums and institutions to private collectors. Of the five most valuable collections of United States coins ever to cross the auction block, we have catalogued and sold four. When the time comes for you to sell your collection, no matter what the size, the same expertise that showcased the world's most valuable U.S. collections, will showcase your coins as well.

Consigning is easy. Simply call John Pack or Rick Bagg in our Auction Department to reserve a place for your coins or paper money. We can offer you an immediate cash advance once your consignment has been received—money to spend right now while we showcase your coins to their finest advantage. In fact, once your coins are on their way to us, we take care of everything, including advertising, insurance, expert grading, authoritative cataloguing, and presentation in the award-winning Bowers and Merena Grand Format style.

When you consign to Bowers and Merena, you consign to the most successful rare coin auction firm in American numismatic history. Join us in Baltimore—it may well be the most financially rewarding decision you have ever made!

COLLECTORS UNIVERSE

CDN0103A

We are buying!

Al Pinkall

We want to buy choice, rare, and interesting U.S. coins in all series from colonials to silver dollars and double eagles. All coins are to be attractive specimens for their issue, certified or uncertified. Price your coins or we will make a cash offer. Any items purchased will be paid for immediately, any items not purchased will be returned at our expense. Please fax 1-603-569-5319, e-mail directsales@bowersandmerena.com or mail your inventory list for review to Al Pinkall, Bowers and Merena Galleries, PO Box 1224, Wolfeboro, NH 03894 or call Al toll-free at 1-800-222-5993 prior to the shipment of your package.

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted, therefore, they are all usually high grades.

MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck

MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percent age of available BU coins make this no-question grade. Must have eye-appeal

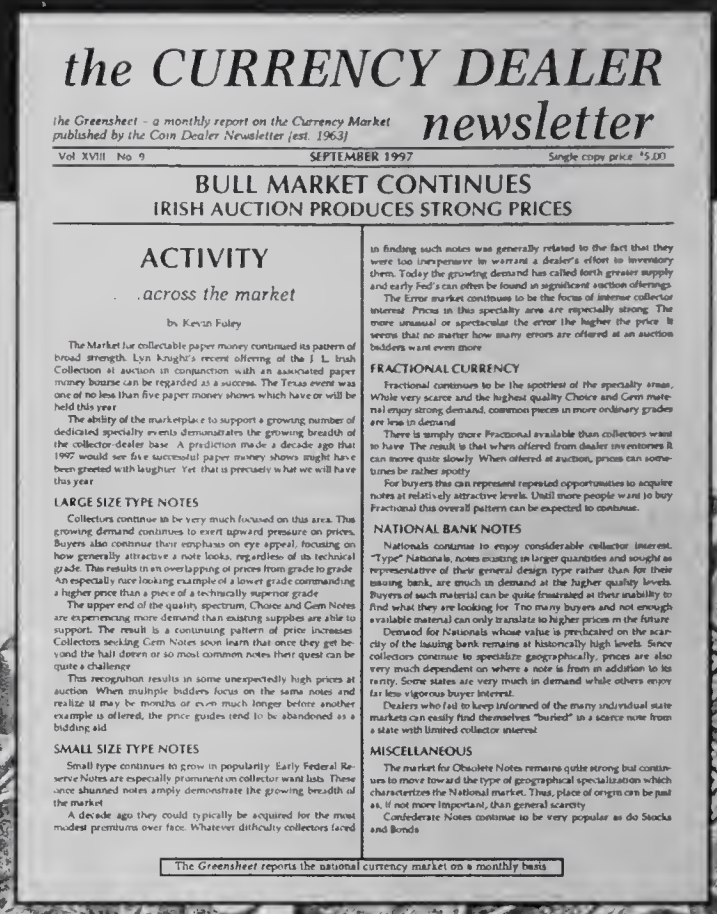

MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides

*Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls

BULL MARKET CONTINUES
IRISH AUCTION PRODUCES STRONG PRICES

ACTIVITY
.across the market

by Kevin Foley

The Market for collectable paper money continued its pattern of broad strength. Lyn Knight's recent offering of the J. L. Irish Collection at auction in conjunction with an associated paper money bourse can be regarded as a success. The Texas event was one of no less than five paper money shows which have or will be held this year.

The ability of the marketplace to support a growing number of dedicated specialty events demonstrates the growing breadth of the collector-dealer base. A prediction made a decade ago that 1997 would see five successful paper money shows might have been greeted with laughter. Yet that is precisely what we will have this year.

LARGE SIZE TYPE NOTES

Collectors continue to be very much focused on this area. This growing demand continues to exert upward pressure on prices. Buyers also continue their emphasis on eye appeal, focusing on how generally attractive a note looks, regardless of its technical grade. This results in an overlapping of prices from grade to grade. An especially nice looking example of a lower grade commanding a higher price than a piece of a technically superior grade.

The upper end of the quality spectrum, Choice and Gem Notes are experiencing more demand than existing supplies are able to support. The result is a continuing pattern of price increases. Collectors seeking Gem Notes soon learn that once they get beyond the half dozen or so most common notes their quest can be quite a challenge.

This recognition results in some unexpectedly high prices at auction. When multiple bidders focus on the same notes and realize it may be months or even much longer before another example is offered, the price guides tend to be abandoned as a bidding aid.

SMALL SIZE TYPE NOTES

Small type continues to grow in popularity. Early Federal Reserve Notes are especially prominent on collector want lists. These once shunned notes amply demonstrate the growing breadth of the market.

A decade ago they could typically be acquired for the most modest premiums over face. Whatever difficulty collectors faced in finding such notes was generally related to the fact that they were too inexpensive to warrant a dealer's effort to inventory them. Today the growing demand has called forth greater supply and early Fed's can often be found in significant auction offerings.

The Error market continues to be the focus of intense collector interest. Prices in this specialty area are especially strong. The more unusual or spectacular the error the higher the price. It seems that no matter how many errors are offered at an auction bidders want even more.

FRACTIONAL CURRENCY

Fractional continues to be the sportiest of the specialty areas. While very scarce and the highest quality Choice and Gem material enjoy strong demand, common pieces in more ordinary grades are less in demand.

There is simply more Fractional available than collectors want to have. The result is that when offered from dealer inventories it can move quite slowly. When offered at auction, prices can sometimes be rather spotty.

For buyers this can represent repeated opportunities to acquire notes at relatively attractive levels. Until more people want to buy Fractional this overall pattern can be expected to continue.

NATIONAL BANK NOTES

Nationals continue to enjoy considerable collector interest. "Type" Nationals, notes existing in larger quantities and sought as representative of their general design type rather than for their issuing bank, are much in demand at the higher quality levels. Buyers of such material can be quite frustrated at their inability to find what they are looking for. Too many buyers and not enough available material can only translate to higher prices in the future.

Demand for Nationals whose value is predicated on the scarcity of the issuing bank remains at historically high levels. Since collectors continue to specialize geographically, prices are also very much dependent on where a note is from in addition to its rarity. Some states are very much in demand while others enjoy far less vigorous buyer interest.

Dealers who fail to keep informed of the many individual state markets can easily find themselves "buried" in a scarce note from a state with limited collector interest.

MISCELLANEOUS

The market for Obsolete Notes remains quite strong but continues to move toward the type of geographical specialization which characterizes the National market. Thus, place of origin can be just as, if not more important, than general scarcity.

Confederate Notes continue to be very popular as do Stocks and Bonds.

The *Greensheet* reports the national currency market on a monthly basis

. . . is a Monthly Publication that is the most COMPREHENSIVE and UP-TO-DATE pricing guide available in today's ever-changing field! DEALER-TO-DEALER BID/ASK Charts cover all of the following areas:

WASHINGTON QUARTERS
Type B Reverse

by Dr. Richard S. Appel

The 1956-1964 Mulings of Proof Washington Quarter Reverses with Business Strike Obverses: The Creation of the Type B Reverse.

The nine year span from 1956 to 1964 is a time frame that hosts among the most interesting and intentionally Mint made wonders in the history of U.S. coinage. They were the product of the Philadelphia Mint official's desire to conserve both time and money, during a period when the country's need for small coinage was intense.

Beginning in the mid-1950's and extending through 1964, the U.S. Mint became increasingly overwhelmed by our nation's commercial demand for minor coinage. This was a period when business was expanding and the need for circulating coins escalated far beyond anyone's expectations. Further, towards the end of this era Silver skyrocketed in price. This compounded the problem as it created a hoarding of these coins. This, in turn, placed additional strain upon the resources of the U.S. Mint, and their ability to satisfy the coinage demands of our great nation.

The Quarter Dollar coin has historically been the work-horse of our minor coinage. As the end of 1956 approached, officials at the Philadelphia Mint realized that many of their business strike Washington Quarter dies would soon wear out. This greatly concerned them as it would impair their ability to produce sufficient numbers of Washington Quarters for the seemingly insatiable demand of our economy.

Their greatest problem was their available **reverse** dies. They were in short supply as they take the brunt of the stress generated when a coin is made, and therefore wear out the quickest. This occurs as it is the lower die upon which the planchet is positioned. It is therefore subject to the most abuse as the force from the upper, obverse die is transmitted through the planchet onto it.

The increased production necessitated by the already enormous demand for the Quarter, had caused the Mint to overwork their dies. Mint officials had not anticipated the unprecedented demand and began to panic as they had little time to produce new reverse dies. They feared that they might be forced to reduce their production of the Washington Quarter if they could not find a solution. Fortunately, a Mint official came upon a unique and unprecedented idea that would solve their problem. It was to reuse some dies that had earlier been employed for coining Proof coins. This would relieve them of the necessity of producing new working dies.

The Proof dies could no longer be utilized for producing Proof coins. They had outlived their original usefulness as they would not impart the desired deeply mirrored Proof fields that are the hallmark of our Proof coinage.

Many of these discarded dies had much useful life remaining but were earmarked for destruction. That was, until the clever Mint official solved their dilemma. They could continue to produce the needed Quarters for circulation and would not have to bear the cost or delay of producing new reverse dies. The decision was then made to press into service the earlier utilized reverse Proof dies, whenever a new reverse working die needed replacement. Thus, the unprecedented Type B Reverse Washington Quarter was created!

Interestingly, only the Philadelphia Mint was responsible for the Minting of these numismatically important coins. Proof coins were produced at that Mint during this era. It is likely that the ready availability of the retired Proof dies at the Philadelphia Mint, contributed to the use of the dies solely at that facility. Of greater importance for the numismatic community is the fact that these conditions combined to allow for the deliberate creation of these impressive, Mint made "errors".

The first business reverse dies were replaced by their Proof counterparts during the last few weeks of 1956. The number of coins produced exhibiting this muled Proof reverse is unknown. However, given the extremely short period during which the Proof dies were utilized and my experience, this is by far the rarest date of the nine years displaying the Type B Reverse. It is quite rare!

AS TIME PASSED THE NEED FOR WASHINGTON QUARTERS INTENSIFIED

In the years following 1956, business demand for Quarters became increasingly intense. With their great success utilizing the Proof reverse dies in 1956, the Mint officials did not hesitate to continue using discarded Proof dies during the ensuing eight years. Thus, during the latter weeks or months of 1957 through 1964, when new reverse dies were needed to produce Washington Quarter Dollars, Proof dies were again used in their stead.

The Proof reverse design of that era differs from that of the business strikes in a number of striking ways. First, the Proof lettering is more sharply impressed and has flat tables and squared corners and edges. Next, the eagle exhibits both greater detail and relief and appears slightly thinner on Proofs, as compared with business strike examples. Additionally, a leaf extends above the uppermost arrowhead point on Proof reverses. Further, on many specimens some degree of a mirrored field remains evident. Finally, and to readily distinguish a Proof die reverse, the E and S of States are widely separated. This contrasts with business strike specimens where these letters virtually touch one another.

I have examined numerous examples of the Type B Reverse from the various years from 1956 through 1964. When I viewed my first specimen I recognized it by the tell-tale separation of the E and S in States. However, after my third or fourth encounter in handling these remarkable Mint products, it became obvious to me when I was studying a Type B Reverse coin. This was due to the impressive visual difference that exists between the two reverses.

From my experience, and in discussions with other experts in the field, the order of rarity for the Type B Reverses of the years 1956-1964 appears to fall into four general categories. The rarest by far is the 1956-P. Next in rarity are the 1957-P, 1962-P and 1963-P emissions. These are followed by the 1958-P, 1959-P and 1964-P mules. Finally, are the most common 1960-P and 1961-P coins. I have been told by one expert in the field that the reason why the 1961-P mule is the most common is the fact that it is often

CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (*Bluesheet*) provides Bids for certified coins only

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

found in Mint sets. However, I have not as yet been able to verify that fact.

MINT OFFICIALS LATER BENEFITTED FROM THEIR EARLIER EXPERIENCE, AND AGAIN UTILIZED DISCARDED PROOF DIES WHEN THE NEED AROSE

During the latter part of the 1960's, the U.S. Mint again could not keep up with the demands of business for Washington Quarters. In 1969, the Denver Mint faced a similar dilemma as had been earlier experienced by the Philadelphia Mint. Mint officials had not forgotten their great success of the 1956 through 1964 period. Thus, beginning in that year and extending through 1972, a number of coins were produced in each year bearing the then current Proof reverse design.

The U.S. Mint primarily blamed coin collectors for the hoarding of our Silver coinage. They stated that it was the collector who withdrew the enormous amount of Silver coins from circulation, and created the great coin shortage of the early 1960's. In 1965, in what appeared to be a punishment for this act, the Mint decided to eliminate the production of Proof sets. However, after a three year hiatus, when the Mint offered the coin collecting public "Special Mint Sets", Proof coin production resumed.

The numismatic community had been quite vocal in their criticism of the Mint's decision to make them the scapegoat. They felt that it was the government's debasement of our currency that created the situation. Gresham's Law states that bad money will drive out good money. When inflation caused an increase in the Silver price it became profitable to melt our Silver coinage. This event prompted millions of average citizens to removed the Silver coins from circulation, as their Silver content became worth more than their face value. They then profited when they sold the coins for a premium, to those who would recover their Silver content.

Importantly, in 1968, the decision was made to reopen the San Francisco Mint. The Mint was ceased operations in 1955, which in retrospect had been a poor decision. The reopening of the San Francisco Mint was hoped to reduce the continuing burden that had fallen upon the shoulders of the Philadelphia and Denver Mints. Further, it was to be this Mint's responsibility for coining our nation's Proof coinage. Thus, for the first time in our nation's history the Philadelphia Mint would no longer be responsible for the coining of our Proof coinage.

The Denver Mint had long been producing the bulk of our Washington Quarters. Thus, they had a far greater need for working dies than did the Philadelphia Mint. For this reason, and possibly also due to their closer proximity to the San Francisco Mint facility, Proof dies were shipped to Denver whenever the need for them arose. At present, I am not certain of the rarity of the 1969-D through 1972-D Washington Quarter mules with the Type B Reverse. There is even less knowledge or recognition about their existence than about those produced during the 1956 through 1964 period. I believe that it will be of great interest to the numismatic community, as new information comes to light through future discoveries, of the rarity of these and their earlier counterparts.

I have discussed the remarkable Type B Reverse mulings of Washington Quarters with a number of knowledgeable dealers and collectors. Some collect or specialize in Washington Quarters. Others have widespread numismatic experience and knowledge, but are more devoted to other areas within numismatics. It amazed me how few were aware of these impressive and important coins. Further, when apprised of the existence of these treasures, they unanimously became extremely enthusiastic and were desirous of learning more about them.

The Washington Quarter Series appears destined to attract an increasing number of adherents as more and more neophyte collectors expand their collections from the Statehood Quarters to the earlier Washington Quarter series. As greater knowledge spreads of the rare and wonderful Doubled Dies, over mint-marked and Type B Reverse coins, I am confident that an increased demand for these coins and the series in general will follow. This situation presents an especially fortuitous opportunity for the collector or investor!

Presently, few numismatists recognize the existence and significance of the Type B Reverse mulings of the Washington Quarter series. This has kept their prices at low levels. However, as more people become aware of the these little known and incredible coins, the demand for them is likely destined to surge as will their prices. How many thousands of collectors would love to have a complete set of these coins? This creates a great opportunity for collectors to find and collect their own Type B Reverse examples. Further, as more collectors search through their collections and rolls of coins, who knows if additional years will be found to contain similar Proof and business strike mulings. As you can see from the above, the Washington Quarter Series offers far more challenge and enjoyment for the true collector than most people suspect.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN

THE MOST MONEY THE LEAST HASSLE

SEE US AT ALL Major Shows

If you have coins to sell, it's time to call SPECTRUM! Dealing with SPECTRUM means more money and less hassle for you, and here's why:

The clients of *The King of Cash* are having another record year! Our needs are so diverse and our buying interests are so extensive that we've purchased single coins for under $4 and for over $1,000,000. Why are customers bringing us coins in record numbers? Because they know they're dealing with world-class rare coin experts with unlimited financial resources. Because they know they'll be treated fairly and courteously. Because they know we have other customers waiting for their coins in all ranges of the price spectrum. Because they know they'll always receive same-day payment. Collectors, investors, dealers, and financial institutions alike know the *Spectrum* secret, and now so do you. If you're interested in selling some or all of your rare coin holdings, why would you want to go anywhere else?

The principal buyers at Spectrum have over 150 years of combined numismatic experience. Our buyers are seasoned veterans in all areas of numismatics, and they know what your coins are worth. Is your collection a specialized selection of 18th century rarities? A large holding of modern proof coins? An estate that was left to you by a loved one? An accumulation that has been in the family for years? A dealer inventory? Rare coin properties come in hundreds of different forms, and *Spectrum* is interested in purchasing them all!

Dealing with *Spectrum* is always as fast, confidential and convenient as you need it to be. We can travel to see you, meet you at our offices, or make an appointment with you for the next coin show in your area. We can also do the entire transaction by mail, as we do hundreds of times each year.

Here's what one of our many satisfied customers had to say recently about selling coins to *Spectrum:*

I was very pleased with your offer. I also appreciated being spared the "critical analysis" most dealers feel they must go through before making an offer. I'm just sorry I didn't try your firm long ago. I'm convinced after my first sale to you that Spectrum is the place to go if you want honesty and fair dealing.

Spectrum has a commitment to customer satisfaction that is unsurpassed in the rare coin industry. Let us help you realize the most money for your coins. Give us an opportunity to serve you.

Call us collect at 949-955-1250. Do it today!

THE RUSH IS ON!

by Michael C. Annis

The discovery of Gold in California in 1848 brought treasure seekers from around the world. Each prospector knew in his heart that he was going to strike it rich and many did. Their efforts to find treasure were so intense that in only a few years most of the Gold in California had been found forcing the unsuccessful to seek their fortunes elsewhere.

Since 1849, pocket Gold had been found by casual prospectors on the eastern slopes of the Sierra Nevada Mountains in the Territory of Western Utah. The decline in prospects of the California Mother Lode coupled with increasing Gold finds on the slopes of the Washoe Hills near Mount Davidson produced an increasing flow of miners from California over the Sierras into the Utah Territory. This migration along with the hopeful from the east continued to build through 1859. Enough ten dollar bonanzas were turning up to keep the Washoe prospectors in beans and whiskey.

Some of the earliest immigrants to this area, becoming known as Gold Canyon, were two amiable Irish prospectors Peter O' Riley and Pat McLaughlin. Like the others, they worked their rockers despite the tenacious blue clay that gummed up everything. Life in general was made miserable by this sticky goo. Two others who arrived on the scene but with a strong disinclination to the hard work were Henry "Old Pancake" Comstock and James "Old Virginny" Finney. While uncommonly drunk one night in the shack town near the head of Gold Canyon, Old Virginny lost his balance and shattered a bottle of whiskey to the horror of Old Pancake. Able to recover after a moments pause, he rose and named the place Virginia City after himself. Neither of these two no-gooders had a clue what was to come to this place.

A sample of the mound of red earth (later to be known as Gold Hill) was carried over the Sierra to Sacramento to be assayed. The results showed $2,200 per ton in Gold. O' Riley and McLaughlin were sometimes producing $200 a day from their rockers. Henry Comstock, a true no-gooder at heart, bilked the gullible Irishman out of an equal share of their claim with dubious evidence of prior ownership. The region was producing so much wealth in Gold dust that Old Pancake was almost constantly in wine. When in this condition he grandly proclaimed the ore underfoot as the Comstock Lode. Thus it became Virginia City on the Comstock Lode which represented thirty tent residences and six packing crates with holes cut in for doors.

Another of the first refugees from California was Abraham VZ Curry carrying with him his dream of founding, developing and expanding a town of his very own. In California all the available town-sites had been bought up and exploited by realtors, he considered to be little more than extortionists. Acquisitive Abe had already set his sights on Mormon Station just over the Sierras in the Utah Territory. When able Abe encountered a real estate speculator there, who must have learned his trade from the masters in California he couldn't move fast enough up the road 15 miles to try again. The only business on the site of the future state capitol was the Eagle Trading Post doing good business on the Emigrant Trail where it began its assent to the Sierras' ramparts. Frank Bernard and George Follonsbee owned the Eagle and were in full agreement with Abe Curry's dreams. A surveyor was imported and the town laid out named Carson in honor of Kit Carson the famous pathfinder and Indian fighter whom Abe admired. Fortune soon smiled on Abe. First an acquaintance had the habit of saluting him and calling him Colonel and the title stuck. Second, the Comstock's proven diggings provided an interlocking boom in freighting and mining supplies from Carson City. The third and most significant was that the Wells Fargo and Company established a branch office in Carson City and this assured a city's future whenever it occurred. The arrival of the firm's route agents and local managers was the equivalent of the arrival of a full ambassador in other parts of the world.

In 1858, Colonel Curry lobbied the United States Congress to build a Mint in Carson City to solve the problem of having to haul bullion over the Sierras through Indian and outlaw territory to the San Francisco Mint. Abe's efforts were bolstered by the existence of three express and stage lines in operation between Carson City and Sacramento. One of these was the celebrated Pioneer Stage Company which connected with the vast freight and staging empire of Russell, Majors and Waddle at Salt Lake. The Placerville, Humboldt and Salt Lake Telegraph came as did the newspaper, The Territorial Enterprise, which moved up from Mormon Station.

Over in Virginia City, O' Riley and McLaughlin continued to work their rockers profitably while Old Pancake Comstock and Old Virginny Finney, now joined in their muscle act by Manny Pearod, supervised operations, talked grandly of the future and did no work that anyone noticed. According to the Comstock's first discoveries, everyone was getting rich. The biggest impediment to this endeavor, next to whiskey and sidewalk superintending, continued to be the thick blue clay that existed in all the best pockets and outcroppings. Mostly they discarded it, when they could, searching it cursorily in free form for any traces of Gold. Even in these conditions there were inquiring minds and one day in late 1859 a curious pilgrim from Grass Valley, over on the California side of the Sierra Nevada's, took a specimen of this blue muck home with him. Through the teller's window in the assay office of James Ott it passed a leading citizen of Grass Valley, Judge James Walsh, underwrote the assay. The results were so unexpected that the assayer Ott ran the test a second time. There was no doubt. The assay showed better than $3,000 per ton, not of Gold, but of **Silver**.

The implications of this information were not lost on the Judge. He pledged Ott to secrecy, confided in his friend Joe Woodworth, and off to Virginia City they went at sunrise with Woodsworth mule and prospecting outfit in tow. Pausing to rest at the 7,239 ft. Donners Summit they looked back and swore an oath at seeing a large part of the population of Grass Valley following them. The rush that followed depopulated the camps of the California Mother Lode just as these camps had originally drained off the population of San Francisco. So numerous were the participants in this stampede to the Washoe Hills that for weeks no vehicle could cross westward over the narrow roads of the High Sierra.

The rush was really on. It is doubtful that any discovery of precious metals in the world's history has produced either the quantity or quality of superlatives used to tell the Comstock story. Everything connected with this rush to the Silver fields of the Western Utah Territory commenced at an accelerated pace. Despite its small population the tremendous wealth coupled with the

CIRCULATION & ADVERTISING Betty Morris

The **CDN MONTHLY SUPPLEMENT** is a supplement to the weekly **COIN DEALER Newsletter** (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The **CDN** may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly **CERTIFIED COIN DEALER Newsletter** (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

war brewing in the east assured the areas early statehood. In 1861, the Nevada Territory was formed from the Western Utah Territory with Carson City as its Capital. On October 31, 1864 Nevada became a state. These events occurred mainly through the efforts of Abe Curry as did Congress' approval of a U.S. Mint located in Carson City on March 3, 1863.

The ongoing "War Between the States" along with normal politics delayed approvals, appropriations and ultimately construction of the Mint. It was not until 1870 that the Carson City Mint, with Colonel Abraham VZ Curry as superintendent, struck its first coins. The low production of coins in the early years was not the fault of the Mint but was more reflective of the miner's preferences of having only ingots struck or of opting for the San Francisco Mints services. These low mintages would have continued had it not been for the millions of Silver Dollars mandated by the Bland Allison Act of 1878. This act, coupled with George T. Morgan's new design produced one of the most storied coin series of all time...The Carson City Morgan Silver Dollars.

The Carson City Mint commenced the striking of Morgan Silver Dollars in 1878 and produced them every year through September 11, 1885. There were no Silver Dollars struck by the Carson City Mint for the years 1886, 1887 and 1888. This hiatus was not the fault of the Mint but of politics. It seems that all the Carson City Mint employees were loyal Republicans in keeping with the political party holding the White House at that time. Democrat Grover Cleveland's election in 1884 put an end to this monopoly as soon as he had dealt with hopefully, more pressing issues of the country. The Carson City Mint was closed and all the employees let go. It reopened, with loyal Democrats in operation a year later but only as an assay office. With Republican Benjamin Harrison's election in 1888 the Mints Democrat appointees were replaced with Republicans and operations resumed. Funding was approved for the fiscal year starting July 1, 1889 and after a few months to get the Mint machinery working again, production of Carson City Mint Morgan Dollars resumed on September 9, 1889. The abbreviated production calendar for 1885 and 1889 helps explain the low mintage figures for these years. Morgan Dollars with the tiny "CC" on the reverse were again produced every year from their resumption in 1889 through 1893, at which time coin production at the Carson City Mint ceased forever. Besides politics, other factors affecting the Mint were Silver production, Silver prices and Mint corruption.

Analyzing the Carson City Morgan Dollar series and the individual coins within the series would normally involve mintage figures and any mitigating circumstances to explain variances between these figures and assumed scarcities. However in this case, mitigating circumstances of coin melts and coin hoards are so significant as to render mintages practically inconsequential. Fortunately today we have a much more relevant source of information for these analyses - coin population or census reports. Enough of these sometimes scarce date Silver Dollars have been submitted for grading to render a high confidence level in the analysis of this data.

An analysis of Carson City Morgan Silver Dollars follows. Only Uncirculated examples were considered. To simplify the presentation a value of 100 was assigned as the value of "availability" to the most common date, the 1884-CC. All other "availability" values are computed from this. As the standards for the determination of "Proof Like" and "Deep Proof Like" have changed since the inception of the grading services, this analysis lumps them together and uses one inclusive value called "% mirror surfaces". The coins are listed in order of decreasing availability (increasing scarceness) with the 1884-CC first and the least available (most scarce) 1889-CC last. I've included a column, not of actual mintages, but of "mintage rank" assigning one to the lowest and thirteen to the largest mintage. Thus we can easily compare availability and mintage.

Most Available	Availability	Date & MM	Mintage Rank (1=lowest)	Average Grade	%Mirror Surface	Comments
	100	1884-CC	8	64 –	16.0	
	95	1883-CC	9	64 –	18.0	
	68	1882-CC	7	64 –	16.3	
	48	1881-CC	2	64 –	11.9	
	46	1878-CC	12	63/64	12.5	
	45	1885-CC	1	64 –	14.3	
	39	1880-CC	4	64 –	11.9	Many Varieties
	28	1891-CC	11	63	8.2	
	19	1890-CC	13	63 –	16.1	Highest Mintage
	16	1892-CC	10	63	12.0	
	10	1879-CC	6	63	13.8	
Least Available	8	1893-CC	5	62 +	9.9	Lowest Average Grade
	2	1889-CC	3	62/63	48.5	Most Extent Specimen Circulated

We can see from a glance at the chart that there is no correlation between mintage and availability (scarcity). We can also see that mirror surfaces stay fairly constant (from 8.2% to 18%) except for the most scarce, 1889-CC with almost half having mirrors. Perhaps the two months it took to restart the Mint machinery in 1889 gave the die workers more than ample time to polish dies.

In general, Carson City Morgan Dollars are much less available than common date/Mint Morgans and the demand for them is unabated. There are rumors of strong buying of them in Europe and taking into account European fondness for the lore of the American West, this may be true. Regardless of the reason, Carson City Morgan Dollars are the most active coins in the market. It seems correct to say that a century and a half after the first, a new Rush is On.

"Thank you for a job well done. As far as I'm concerned, your firm deserves every accolade it has ever received—and many more! Bowers and Merena dispersed my collection with the same kind of loving care that I had taken in forming it to begin with.

"Meticulous preparation went into each stage of the sale, from the photographing and cataloguing of every individual coin to the staging to the auction itself—in a setting that bespoke a major numismatic event."

Cordially, C.M.M., M.D.

"...The publicity, research, presentation, and descriptions in your beautiful catalog were certainly the reason for the success of this auction. I would be more than pleased to highly recommend choosing your firm to anyone thinking of selling a collection. The results speak for themselves."

Sincerely, R.E.H.

"Personally, I was treated with respect. Our underlying negotiations were amicable and businesslike. My coins were fairly described and where appropriate, frequency of appearance was painstakingly researched. The photography and enlargements were appropriate and well laid out.

"I enjoyed attending the auction, where it was clear that the catalogues had reached a national audience with active floor and internet bidding . The prices realized were quite favorable and exceeded my expectations. Payment was prompt and as promised."

Best regards, S.C.L.

"The bid price was almost twice the value I expected, given the auction climate of these coins in recent years. However, the outstanding marketing expertise of Bowers and Merena was undoubtedly the principal factor in the highly successful results of this sale!

"All of the people at Bowers and Merena with whom I dealt were very cordial and informative. I can enthusiastically recommend Bowers and Merena to anyone wishing to sell coins at auction."

Best Wishes, Mrs. A.B., Jr.

"It is with enthusiasm that I write to tell you that my dealings with Bowers and Merena, from the first telephone call to the final settlement of my portion of the sale, have been helpful, cordial, and professional."

Very sincerely, F.D.A.

Let our success be your success! Consign your coins to our upcoming auction season featuring sales in Chicago, Baltimore, Los Angeles, and other major metropolitan areas. And, like the above testimonials and over 15,000 other consignors, we are sure you'll be pleased with the results! Simply call us toll-free 1-800-458-4646 and we will tell you how you can include your coins in one of our remarkable events. It may be the most financially rewarding decision you have ever made!

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are in the CDN

RARE GOLD

If you are a marketer of rare United States Gold coins and you do not receive my wholesale price list, you may be costing yourself money.

I'm one of the largest wholesalers of rare United States Gold coins in the world. I have over twenty years experience in wholesale gold coin sales.

Each week, I put out a "user-friendly" inventory list which contains over $1 million of choice, fairly priced rare U.S. Gold coins.

I specialize in PCGS and NGC graded U.S. Gold coins struck from 1795 to 1900 in Very Fine to Mint State grades.

Comprehensive support material is available. I can increase your sales and make it easier for you to sell rare U.S. Gold coins.

BUYING ALL BETTER DATE GOLD ESPECIALLY WANT THE FOLLOWING TWENTY DOLLAR GOLD PIECES

1850–1876 TWENTY DOLLAR AU 53 – MS 65
CARSON CITY 20 DOLLAR AU 53 – MS 63
ALL SLIGHTLY BETTER DATE 20 DOLLAR MS 62 OR BETTER

If you would like to be put on my mailing list or receive my regular fax list, PLEASE CALL.

LIBERTY NICKELS

BUILDING A U.S. GOLD TYPE SET

by David Goldsmith

Recent events have caused a large surge in Gold prices. This, as well as other factors have resulted in significant price increases for U.S. Gold coins as well. While Lincoln Cent or Buffalo Nickel collectors can collect the entire series without great expense, collecting Gold coins by date can be a prohibitively expensive undertaking. A reasonable alternative is to assemble a Gold "Type" set. A Type set is defined as one coin of each design or major variety within a series giving the collector the greatest number of different coin designs, each having a history of it's own. Common date coins are generally preferable, as the goal of a Type set is to obtain the highest grade possible for the least amount of investment.

Depending on the collector's pocketbook, there are several possible sets that can be assembled. The 8-piece Type set, otherwise know as the 20th Century Gold Type set, consists of two examples of each of the $2½, $5, $10 Liberty and Indian Types, as well as the $20 Liberty and Saint-Gaudens Type. The 10-piece Type set also includes the Type 1 and Type 3 $1 Gold coins. The 12-piece Type set would also include the much more elusive $1 Type 2 and $3 Gold examples.

$1 GOLD

Issued for the first time in 1849, the $1 Gold piece was struck to satisfy the demand for circulating currency, since much of the Silver coins in circulation were being hoarded and melted as the price of Silver escalated. Designed and engraved by the Mint's engraver, James B. Longacre, the Gold Dollar was slightly modified during 1849 with a slightly larger Liberty head. The Type 1 coin, as it has become to be known, is the smallest regularly issued U.S. coin ever produced, at a mere 13mm. They circulated widely, but are available in Uncirculated grades at a reasonable price. There are two other distinct Types of $1 Gold pieces. During 1854, the $1 Gold coin was re-designed, making it larger in size, at 14.86mm, to make it easier to circulate. It was designed with an Indian Princess, struck in high relief. Although larger in size, it was thinner, and because of striking irregularities, it was modified in 1856 with a shallower relief portrait (Type 3). The Type 2 issue is scarce, especially in high grades of MS-60 or higher, due to their low mintage, and will be the most expensive coin in the 12-piece Type set.

$2½ GOLD

Early $2½ Gold pieces, otherwise known as Quarter Eagles, were first produced in 1796. By 1834, the price of Gold had risen to the point that the issues produced from 1796 to 1834 were worth more melted down than their face value, nearly wiping out the small mintages. These coins remain extremeiy scarce, and are not included in most U.S. Gold Type sets. In 1834, the size and weight was reduced, and the redesigned $2½ Classic Head was produced, from 1834-1839.

Christian Gobrecht engraved the Coronet, or Liberty Head design first used on Quarter Eagles in 1840. It weighs 4.18 grams, composed of .900 fine Gold, with a diameter of 18.2mm. This design represents four different denominations of the Gold Type set, lasting almost 70 years!

In 1908, noted Boston sculptor Bela Lyon Pratt's design adorned the Indian Head Quarter Eagle. It was influenced by the incuse art styles of ancient Greece. The main design of the coin is of incused relief or below the main surface of the coin. This was the first American coin to have a *native* American depicted. Ridiculed at first, Theodore Roosevelt approved the design, and it lasted until 1929.

$3 GOLD

One of the scarcest and most short-lived denomination, the $3 Gold coins were originally produced, along with the 3¢ pieces, to facilitate Postal transactions, since postage was 3¢ at the time. Like the $1 Gold coin, James B. Longacre designed it. It was produced from 1854 through 1889. They were used in commerce at the time, thus are scarce in fully Uncirculated condition. The dates usually seen in quantity are the 1878, 1874, and 1854 issues, and would be the best choice for a Type set. Higher-grade Mint State examples are very rare, as the large field surfaces were easily scuffed and bag-marked.

$5 GOLD

The earliest of all Gold denominations was the $5 Gold, Half Eagle, first produced in 1795. Like the $2½ issues, those from 1795 to 1834 were melted down for their higher Gold content than their face value, and remain very scarce today. The smaller and lighter Classic Head series was issued from 1834 to 1838.

In 1839, the Coronet or Liberty Head was introduced. It was designed and engraved by Christian Gobrecht. Weighing 8.359 grams, it was composed of .900 Gold, with a diameter of 22.5mm. It was modified in 1866 with the addition of the Motto "In God We Trust" added to the reverse. This Type lasted until 1908.

During the year of 1908, Bela Lyon Pratt also designed the Indian Head Half Eagle. Theodore Roosevelt wanted a new design for the long-lived Liberty series Gold coins. Pratt designed the $5 Indian Head in incuse relief (along with the $2½) that was produced until 1929. The most plentiful date is the 1909-D, a good choice for a Type set.

$10 GOLD

$10 Gold pieces were also first produced in 1795. Two early Types were made, the Capped Bust, Small Eagle reverse, 1795-1797, and the Capped Bust, Heraldic Eagle reverse, 1797-1804. They are all extremely rare. There were no further $10 coins produced until 1838.

As with the $5 piece, Christian Gobrecht designed the $10 Coronet or Liberty Head Gold coin. It weighed 16.718 grams, of .900 fine Gold, with a diameter of 27mm. Like the $5 piece, the Motto "In God We Trust" was added in 1866, creating two distinct reverse varieties. Mint State examples of the No Motto Type are very scarce, and expensive. The Motto Type was made until 1907.

Augustus Saint-Gaudens, one of the most prominent sculptors of the time, designed the Indian Head $10 Gold coin in 1907. It was **not** modeled after a native American, as the Pratt $2½ and $5 coins were, but a caucasian female wearing an Indian headdress. Theodore Roosevelt requested that the Motto "In God We Trust" be excluded from the 1907 and 1908 issues. An Act of Congress added the Motto, during 1908, and remained on the reverse of the coin until retired in 1933, when Theodore Roosevelt's cousin, Franklin D. Roosevelt, took the country off the Gold Standard. This is one of the few coins without a Reeded Edge. The first issues had 46 Stars around the rim, signifying the number of states in the union, and then, in 1912, changed to 48 Stars. A beautiful coin in Mint State the common years for a Type set would be 1926 and 1932.

EXECUTIVE DIRECTOR Pauline Miladin
EDITOR Keith M. Zaner
PUBLISHER Shane Downing
CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

$20 GOLD

In 1849, James B. Longacre designed the $20 Liberty, a huge, nearly one-ounce Gold coin. Weighing 33.436 grams of .900 fine Gold, it would be Minted from the huge Gold reserves resulting from the California Gold rush. Possibly two coins were produced with the 1849 date, one now residing in the Smithsonian Institution, the whereabouts of the other remains unknown. It was produced in quantity from 1850 until 1907, with three varieties.

The first did not have the Motto "In God We Trust"; the second had the Motto added. The third was a slight change in the wording on the reverse. The original "TWENTY D" wording was changed to "TWENTY DOLLARS" in 1877, making the third. The most common date is the 1904, available in large quantities and high-grade, an ideal choice for a Type set.

During the same time he designed the $10 Indian, Augustus Saint-Gaudens sculpted the stunning 1907 High Relief $20 Gold coin. It was truly a three-dimensional coin with the standing Liberty figure in great detail and relief; with a Roman Numeral date MCMVII (1907). Out of an original mintage of 11,250 most survive today, although high-priced due to its popularity. Due to banking problems with the coin (it wouldn't stack), it was re-engraved to a lower relief. As with the smaller Types, the Motto was added during 1908, making two varieties. It is usually referred to as the St-Gaudens Type. It was produced from 1907 through 1933. The only legal example of the 1933 "Saint" was recently sold at auction for $7.6 million. The original design continues to flourish today as the U.S. Mint's Gold American Eagle coin produced from 1986 to the present.

CONDITION PLAYS A ROLE

Putting together a uniform set is always preferable. Purchasing coins of similar grades accomplishes this goal. In Uncirculated MS-60 to MS-62 grades this presents an affordable set. In MS-63, MS-64, and MS-65, the prices increase drastically. Collecting these sets "raw," or uncertified, also presents a challenge, as there are many counterfeit and problem coins on the market today. Purchasing certified, encapsulated coins, offers protection from these perils, as well as instant liquidity when it comes time to sell. NGC (Numismatic Guaranty Corporation) or PCGS (Professional Coin Grading Service) "slabbed" coins offer the most consistent grading, as well as highest resale value. The other recognized services: PCI, ANACS, SEGS and ICG, offer a less expensive alternative, although you should also expect a discount when reselling. Choosing one grading service's holders for the entire set will make it more uniform and attractive.

Another factor in choosing a Gold coin is spots. The so-called reddish "copper spots" that appear on some Gold coins is really a misnomer. Gold coins that have their original "skin," will sometimes have one or more of these spots, a testament to the fact that they have not been cleaned. Some years ago, Gold coins were actually worth more with these features! In most cases they are merely toning spots, where a tiny speck of dust or other foreign particle has landed on the coin, and over the years, toning has developed around it. They are easily removed with a coin cleaning solution, so many of the current "spot free" coins on the market have probably been cleaned at one time.

PRICING

See the chart below for the highest dealer-to-dealer wholesale Bids for the 12-piece Gold Type Set. These Gold Type Bids are published weekly on the front page of *the Coin Dealer Newsletter -Greysheet*. Sight-Unseen Bids can be found on page 4 of the *Certified Coin Dealer Newsletter -Bluesheet*, also published weekly.

U.S. Gold Type	11-Apr-03 MS60 Bid	11-Apr-03 MS63 Bid	11-Apr-03 MS64 Bid	11-Apr-03 MS65 Bid
$1 Type 1	$200	$930	$1,550	$4,360
$1 Type 2	$2,700	$9,750	$14,800	$30,750
$1 Type 3	$210	$850	$975	$1,300
$2 1/2 Liberty	$215	$660	$750	$1,170

$10 Indian	$305	$630	$1,200	$2,520
$20 Liberty	$425	$575	$1,000	$3,000
$20 St.Gaudens	$430	$475	$545	$925
12-Piece Type Set	$6,765	$20,910	$31,060	$68,435

SOURCES

There are many sources where these coins can be obtained. Through a local coin dealer, or coin convention is ideal, as you can see the coins before buying. Another alternative is through the Internet, on a site such as *ebay.com*. Buying online gives you the advantage of exposure to a national market from your home computer. Conventional auction houses can offer a good buy, but remember the "buyer's fee" that's added to the price you pay for your lot. It averages 15%.

REGISTRY SETS

The major coin grading firms, NGC and PCGS offer the services of a registry set. They both maintain a database that contains the highest graded sets of certified coins, in a number of categories, including a number of Gold Type sets. You can register your set, and then it compares you in rank among all others in the category you have chosen. Competition is fierce to have the top-rated sets, and many auction records are established when there are several Bidders competing to buy coins that are the highest graded.

SUMMARY

While not mentioned in this article, the $4 Stella Gold coins deserve one. While technically a pattern, a number were produced (450 pieces in Gold). At $50,000 to several hundred thousand dollars, it is out of reach for most collectors. So are most pre-1834 Gold coins. The 8-,10- and 12-piece Gold Type sets offer a nice challenge to obtain the highest grade as well as a good variety of true works of art. It was a time in our history when true artisans created our money, something that has been lost in the Mint's offerings in many years.

When Great Collections are Sold Bowers and Merena Sells Them!

Over the years we have sold hundreds of millions of dollars worth of coins for over 30,000 consignors, ranging from important private cabinets such as the Louis E. Eliasberg, Sr., Collection, The Harry W. Bass, Jr. Collection, and the Norweb Collection, to institutional collections such as those of the New York Public Library, The Johns Hopkins University, the Massachusetts Historical Society, the Connecticut Historical Society, the Salvation Army, Boys Town USA, and many others.

When the time comes for you to sell your collection, there is one obvious choice—Bowers and Merena Galleries. Of the five most valuable United States coin collections ever to cross the auction block, we catalogued and sold four. We also hold many of the top world record auction prices and more records in the top ten than any of our competitors.

Whether your collection is worth several thousand dollars or several million dollars, we look forward to working with you. We offer an unequaled record of success, award-winning Grand Format™ catalogues prepared by some of the world's best known numismatic professionals, and the showcasing of your collection to our world-wide mailing list.

Right now we are planning our next several sales and invite you to participate. Call Mark Borckardt, or Paul Montgomery, at 1-800-458-4646 and we will set you on the road to cashing a very generous settlement check. We can even provide a cash advance if you desire. There is no obligation, only the opportunity to sell your rare coins, or your complete collection for the very best market price.

Let our success be your success as well. The same firm that offered the collections listed here will present your coins to buyers who have set numerous world record prices in the past. Contacting us may be the most financially rewarding decision you have ever made.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark–these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices–particularly the pre-1941 issues. Washington rolls–dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

Rainbow Toned Dollars "The Experiment"

By H. Robert Campbell

Usually I write articles on "How to Detect Artificial Toning," and not about how prices have risen for Rainbow Toned Dollars. In this article, I will try to explain what has happened in price to beautiful and exceptionally toned Morgan Silver Dollars. Their price increases have been **exponential** to say the least.

Since my first talk about toning at the 1994 Annual American Numismatic Association's (ANA) summer convention in Detroit, I have seen prices on toned coins tumble and now rebound with a vengeance. I believe my talk on "How to Detect Artificial Toning" (which has since been given about 50 times throughout the country) has probably hurt the market of Rainbow Toned Dollars for a short time, because many numismatists thought their coins may have been artificially toned. But in the long run, as numismatists learned along with me how coins toned naturally, everyone benefited. The market is now hot, and would have been considered extremely hot about six months to a year ago. This article will explain why I believe this to be true, and what happened at a possible peak during the September 2002 Long Beach Coin Expo.

To better help you comprehend the market on rainbow toned coins; I believe you have to understand how eBay has affected the toned coin market and changed the way dealers like myself do business. For the past several years, I believe most rainbow toned coins (90+% Dollars) have traded hands "online." It has in many cases eliminated the "middle man" coin dealer. Some wonderful bargains are to be found and at the same time, some price gouging has occurred. Some sellers have been known to **enhance** the pictures of the Dollars, making the colors more intense than they actually are by bombarding pieces with high intensity light. They can also literally paint new colors on the images with the many different photo manipulation programs that are available. In spite of a few dubious individuals out there on the net, rainbow toned coins, particularly Morgan Dollars, have multiplied in price in the past three years. I believe that many new collectors have entered the market and pushed prices up in spirited online Bidding as a result of their numismatic inexperience. They don't know what to pay, they just know that they want it right *now* and don't understand the patience that it takes to assemble a nice collection. During the past year there seems to have been a decrease in the availability of beautiful Rainbow Toned Dollars at major shows around the country. It seems that they have all but disappeared. Before each large show begins, and before the retail public comes in, I always get hit first by the Early American Copper (EAC) guys, rag pickers, and better trade token dealers. But now I also get hit just as hard by dealers looking for screamer Dollars with Godzilla toning. About five other major toned coin dealers as well as myself are looking to score and frantically run from dealer-to-dealer during set-up to beat each other out of succulent new rainbows entering the market. Gone are the days of "cherry picking" examples of bag toned Dollars from unsuspecting dealers during dealer set-up and paying inexpensive prices. We have come to the end of finding real bargains at set-up that can "make your show" before the general public enters. The word is out... Rainbow Toned Morgan Dollars of the right type and color intensity can bring astonishingly ridiculous prices! Dealers in the business sometimes call these prices "stupid money," and believe me this money is!

In the title of this article I mentioned the "experiment". To elaborate on that, it could be said that I wanted "lightning to strike twice." Earlier I mentioned the 2002 Long Beach show which is the time and place when I saw just how much someone was willing to pay for some top-end Rainbow Toned Morgan Dollars. It happened at an auction conducted by Ira and Larry Goldberg. Just before the show there are usually three auction companies Bidding for dealer and collector attention. It's kind of like a Pre-Long Beach auction show in Beverly Hills. I had received the auction catalogs weeks before the sale and was hoping to buy some nice toned Dollars to add to my inventory. Ira and Larry Goldberg Coins & Collectibles always does a wonderful job with photography and highlighted many great full color pictures of their best examples in the catalog and online. I was sitting in the audience during the auction with my Bidder card in hand and a room full of other dealers. I believed a few of them would be my main competitors for about half a dozen Morgan Dollars with the right look. These I knew would bring good money at the show a couple of days later. Here are some examples of what I thought I could buy them for and what they and others brought at auction.

Ira & Larry Golgberg C&C 9-20-02						My	Final
Lot #	Date	Service	Grade	CDN Bid	Estimate	Bid	Price
573	1879-S	PCGS	MS65	$74	$700-$900	$500	$1,955
581	1880-S	ANACS	MS67	$485	$1,500-$2,000	$850	$2,300
582	1880-S	PCGS	MS66	$160	$1,500-$2,000	$700	$3,220
584	1880-S	PCGS	MS66	$160	$1,400-$1,800	$650	$3,163
599	1881-O	PCGS	MS65	$1,260	$1,500-$1,750	none	$2,588
601	1881-S	PCGS	MS65	$74	$2,500-$3,000	$1,200	$4,945
602	1881-S	PCGS	MS65	$74	$2,500-up	$1,300	$4,945
604	1881-S	NGC	MS66	$160	$1,500-$2,000	$600	$1,725
606	1881-S	NGC	MS66	$160	$1,000-$1,500	none	$2,070
608	1881-S	PCGS	MS66	$160	$700-up	none	$1,392
627	1882-S	NGC	MS67	$800	$900-$1,300	none	$2,530
651	1886	NGC	MS67	$800	$1,500-$1,900	none	$3,738
652	1886	PCGS	MS66	$165	$1,000-$1,500	none	$2,300

CDN Bids from 9/20/02 are for accurately graded Dollars of average quality.

As you can see... I got blown out of the water. I didn't get any toned Dollars on that day. The other dealers at the auction and myself thought that the market had gone crazy. We all assumed they were bought by mail Bidders and would be returned later— none were! I also knew the history of at least one of the Dollars that was being sold. I had bought it at the New York ANA show in August, a year earlier. It was an 1882-S PCGS MS-65 Morgan Dollar that I had bought during PNG set-up for $350. I then sold it during ANA dealer set-up to another toned coin dealer for $550. It was lot #628 and after an opening Bid of $1,500, the hammer price of $1,650, plus the 15% buyer's commission pushed the sale price to $1,898. That price caught me completely off guard. Its estimated value was $600 and up. Not a bad return... 350% for two months of curing. The coin had intense colorful bag toning on the obverse with contrasting textile checkerboard toning on the devices. The hammer price of this particular example, as well as other lots that were sold floored me. Thus "the experiment" at Long Beach began. I bought a new group of toned coins, at that September 2002 Long Beach show, with the sole purpose of hopefully having history repeat itself. I thought that if I could buy the right look on Dollars at the show before word got out among the general population of dealers at Long Beach I could make a killing. I spent almost $10,000. I just had to wait until the February 2003 Long Beach sale to see my profits realized in what I thought was a new level of price increases for Rainbow Toned Dollars. I assumed that Ira Goldberg would only accept a certain amount of toned Morgan Dollars in their sale and so I wanted to be first in line. I made arrangements with him to consign the following lots:

Ira & Larry Golgberg C&C 2-24-03								Final
Lot #	Date	Service	Grade	CDN Bid	Cost	Estimate	Reserve	Price
654	1947*	NGC	MS67	$2,100	$2,200	$2,000-up	$2,400	Buy Back

The **CDN MONTHLY SUPPLEMENT** is a supplement to the weekly **COIN DEALER Newsletter** (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The **CDN** may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly **CERTIFIED COIN DEALER Newsletter** (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

I thought if it happened once, can it happen again? Well it didn't! The "experiment" failed miserably. It cost me an additional $450 in buy back fees and when everything was paid-up I made about $175 for my $10,000 "experiment". Either the market changed between the two Long Beach Shows or prices were somehow artificially pumped-up during the September 2002 Pre-Long Beach auctions. I'm still trying to figure out what happened and haven't reached my final conclusion. Was I a victim of manipulation by the auction company or someone else, or was it the syndrome I see with collectors who may feel one Type or example is "enough." I do want to say that I felt well treated by the Goldberg's – just unhappy with my results.

To understand what can bring big money as far as colors go and how much toning is enough or too much, you need to comprehend how toning occurs and how the sequence of oxidized colors appear on Silver Dollars. The toning sequence is yellow, magenta (red), and cyan (blue). This process can and does repeat itself many times in the shape of an arch to form a rainbow on Morgans that come out of original bags of Dollars. In the case of the second sequence, the colors mix and green replaces blue. Usually if there is a third sequence the green is again in place of the blue. If you examine the pattern it will appear to be yellow, red, blue, yellow, red, green, etc. in a repeating sequence. In my opinion, the "big money" colors are **red** and especially **green** on Morgan Silver Dollars. The color red is really a florescent cherry pink to a crimson shade. The green color is a eucalyptus to electric forest green shade that has shocking vibrancy. Experience in viewing these Morgans will bring an understanding of what brings "stupid money," but once it's shown to you, you *will* understand and never forget. Another factor, which plays an important part in the value, is the width of the color bands in the trademark rainbow arch. They should range, in the best case scenarios, from about 3-6 mm, up to what opal dealers call a "broadflash," in which large areas are covered with the same color. Usually certain dark colors and the percentage of the coin covered make dramatic differences in price. Some collectors like to see a good portion of yellow and white on the Dollar but most want to see a classic rainbow with ample red and green. I would say that if a Morgan Dollar is rainbowed about 2/3 to 3/4 of the way across, then the coin has the optimum price potential. Also, if the obverse is toned as compared to the reverse, it will bring more money...the ratio is about 1½ to 3 times more money. Rarely are both sides toned on a Rainbow Dollar as it would have had to flip over in a bag of Dollars or be caught in some fold in the bag to have toning on both sides. I've seen it only a few times and of course it brings more money. If a superb coin is in a certified holder and the reverse is toned, it's worth getting it reholdered and turned around. I know it seems silly but the reverse side up with the certification label consistently brings more money and sells faster in my shop.

In the market, PCGS still has the lead in bringing the highest prices for Rainbow Toned Dollars. NGC is somewhat behind with ICG and ANACS certified coins bringing about 2/3 of what the other top two companies realize. SEGS and PCI bring up the rear, earning a comparatively fraction of the other services. Most collectors want to see that the coin will certify, *paying no attention* to the market grade. I buy for the color and not for grade, but it does factor into the value with most dealers. To say beauty is in the eye of the beholder is an understatement in this sliver of the market. If the colors really "jump," any price is possible. I've had dealers at my table thinking I was insane for asking as much as I do on a Rainbow Toned Dollar, and then ten minutes later I've sold it to another dealer who marks it up 300% and sells it again. It's crazy, and similar to the good old days where gut pricing takes precedence over reason and logic. I guess that's why I like it. The prices can take your breath away, while everyone is scrambling to understand them so they don't leave too much money on the table as they price a beautiful Rainbow Toned Dollar.

Another point I would like to make has to do with 3rd party grading services. Originally, in 1985, when "market grading" and slabbing became a force in the hobby, the idea was that grading services were going to grade a coin for what it's worth, and not on the technical (grade) merits. This might work with good luster or great strike but it has never worked with rainbow toned coins. I know certification services make an attempt to upgrade 1 or 2 points on fantasticly toned coins to attempt to compensate the extra value of rainbow toning, but they have always fallen short of the idealistic goal that they started out with. Attractively toned coins can range from 10%-20% over *CDN* Bid to 5-10+ times *CDN* Ask for the right colors that jump off the coin. Keep in mind *CDN* Bids are for accurately graded coins of average quality for the grade. The coins that bring "stupid money" are the ones you can't stop thinking about after you have passed on an opportunity to buy. Over the years, I've made it a point to buy the best toned Morgan Dollar I could find at each major coin show. To say I "stretched" is not saying enough. Sometimes I believe I've committed financial suicide when buying a coin that takes your breath away, but you know what, I don't ever have those coins for very long. I've never got stuck in something with gorgeous eye appeal such as Rainbow Toned Morgan Dollars. At this point in the article you might ask – does this guy really know what he's talking about? Others might ask how a medium sized dealer from the small coin state of Utah got elected to the prestigious office of President of the ANA. It was because of the ruckus I made during a Numismatic Theatre presentation at the 1994 ANA Detroit Convention where I presented groundbreaking information on how coin doctors were consistently fooling the grading services. The numismatic press picked up the story and magnified it to where my name became nationally recognized throughout the hobby. The attention I received from that talk was phenomenal. Fortunately (or unfortunately) for the most part, people get elected to the ANA Board of Governors because of their popularity and name recognition and not because of their skills that will benefit the association. (I know it sounds cruel but it's true, and that's another possible article for the future! Fortunately the grading services are much better now when it comes to detecting artificial toning on coins. Perfection hasn't been reached in artificial toning detection, but dramatic improvements have been made. Artificial rainbow toning really wasn't a factor on toned Morgan Dollars because coin doctors never really could get the right look on them to fool anyone with just a moderate amount of experience.

I am still evolving as far as my conclusions on where the toned market is heading. I believe that the really super high-end "pant-wetting" type of toning will still bring even more stupid money and the mediocre type of toning (that an inexperienced dealer thinks is neat), will stay the same or decrease slightly because of the, "I already have one" collector factor. I still collect toned coins myself and believe them to be a good value that will go up in price. My goal would be that dealers and collectors could become more educated and savvy in their buying practices on toned coins in general. If there are elements of this article that are hard to understand, just ask a major dealer of Rainbow Toned Dollars or myself for clarification. I'm still writing a book, "How to Detect Artificial Toning," and hopefully will have it out in the not too distant future. Finally, I'll leave you with some "good-natured" advice— remember, "big sharks eat little sharks." Keep learning and trusting yourself and not what somebody's plastic says. See you during dealer set-up.

Mike Fuljenz KNOWS The *REAL* Value Of Your Coins... DO YOU?

YOUR FREE PROFIT BOOSTER KIT INCLUDES:

1 ***INSIDER'S GUIDE TO U.S. COIN VALUES –*** This 223 page national price guide, published by Bantam Doubleday Dell, shows you the fair market value of virtually every U.S. coin from half cents to gold coins (a $5.00 value).

2 ***TYPE III DOUBLE EAGLES 1877-1907 –*** This is Mike Fuljenz's award winning Year 2000 NLG Investment Book of the Year. A complete 190 page guide to buying and selling these American treasures and much more (a $29.95 value).

3 ***A COLLECTOR'S GUIDE TO INDIAN HEAD QUARTER EAGLES –*** A Year 2001 NLG Book of the Year Award-Winner with complete listings and price information on this historically unique "incuse" design coin (a $19.95 value).

4 ***THE TOP COINS FOR 2002 –*** Two of Mike's top picks 2000 are already up over 60% (a $9.95 value).

5 ***HOW TO SELL YOUR COINS AT MAXIMUM PRICES*** (a $9.95 value).

6 ***WHY ALL YOUR IMPORTANT RARE GOLD, SILVER, & PLATINUM COINS SHOULD BE CERTIFIED!*** A hard-copy of Mike's 2002 NLG Award-Winning Article (a $9.95 value).

7 ***HOW TO PUT YOUR COINS IN AN IRA*** (a $9.95 value)

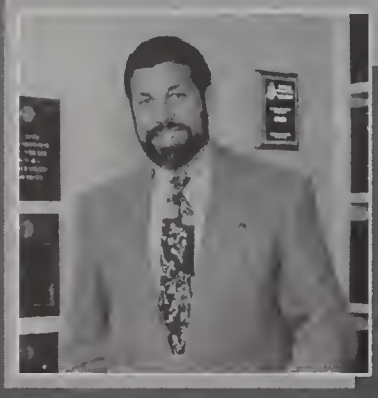

8 ***TEN QUOTES*** on coins you already own (a $10.00 value).

9 ***ONE FULL HOUR OF MIKE FULJENZ'S TIME*** To ask specific questions about coins you either own or want to buy. For 18 years, the prestigious American Numismatic Association consulted Mike Fuljenz to teach their seminars on precious metals and rare coins. Now you can too (a $295.00 value)!

10 ***A FIVE-YEAR SUBSCRIPTION TO MIKE FULJENZ'S SIX-TIME NUMISMATIC LITERARY GUILD (NLG) AWARD-WINNING NEWSLETTER INVESTOR'S PROFIT ADVISORY –*** Every issue tells you where the market for gold, silver, and rare coins is going–and how you can profit from it. You'll learn about factors creating market volatility, and price escalation for precious metals and rare coins (a $250.00 value).

DEALERS WELCOME!

ONLY **$8** *A $650 VALUE FOR JUST THE COST OF PRIORITY SHIPPING*

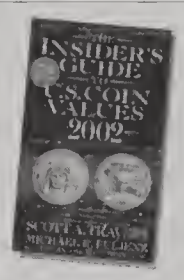

Michael R. Fuljenz is an unprecedented 23-time national award-winning reporter in his field, and the 2000 TV Reporter Of The Year for his CNBC appearances with Ted David. He is also a past recipient of the American Numismatic Association Presidential Service Award, and is the President of Universal Coin & Bullion Ltd.

MIKE FULJENZ'S award-winning Year 2003 Profit Booster Coin & Bullion Kit will reveal to you what your coins are worth now and teaches you how to maximize their value when you sell. It will give you all the "inside track" information you need to learn how to:

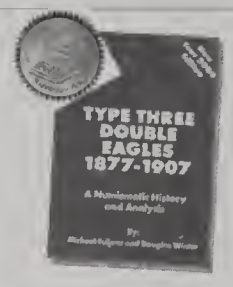

- **Buy or Sell Certified Gold and Silver Coins Without Getting Ripped Off**
- **Put Coins In Your IRA**
- **Strategically Build a Precious Metals Portfolio of Exceptional Quality & Value**

Despite a roller coaster stock market, we can show you how to diversify into a proven area of stability and performance.

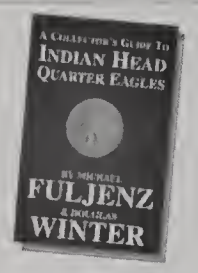

THE AWARD-WINNING PROFIT BOOSTER KIT INCLUDES:

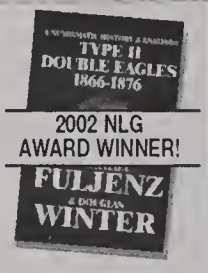

231 Page Random House Dell Price Guide

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series some of the rolls in the late 50's tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

WHETHER IT'S A $4,000,000 1804 DOLLAR OR A MODERN ISSUE PROOF SET...

IF YOU HAVE COINS TO SELL...

The only strategy that makes sense...is to call the King Of Cash before you actually sell your coins!

Nobody spends more money buying U.S. coins from collectors and investors like you than **Spectrum Numismatics!** And the nice thing about **Spectrum** is we desperately need to buy all of your coins. That's why our name is **Spectrum**...we buy it all!

• MODERN COIN DIVISION With the acquisition of Lee Cook, renowned Modern Coin expert, **Spectrum** urgently needs to buy all the Modern Coins it can accumulate! While **Spectrum** has always bought Modern Coins in limited quantities, we now need to spend millions of dollars on Modern Eagles, Proof Sets, Mint Sets, BU Rolls, and all your Modern Issues!

• MARKET KNOWLEDGE When you deal with **Spectrum**, you deal with **numismatic** professionals. We have the knowledge that covers the spectrum, whether it's a collection of early United States rarities, a hoard of pre-1950 20th Century coins, Patterns, Modern Issues, or a large and diverse holding in all areas of the market. We are interested in buying. Period.

• IMMEDIATE FUNDS There is no waiting! You don't have to wait until we sell your coins. You don't have to wait while we call in an outside expert to evaluate your coins. Why? Because **Spectrum** has the customers, we have the money, we have the experts, and we have the experience. Nobody pays more...nobody pays faster...nobody makes it easier for you to sell your coins.

• GENEROUS FINDER'S FEES If you find a coin deal that's too large, too complicated, or one you don't want to get involved in forany legitimate reason, you don't have to leave the money on the table. Call **Spectrum**!

• HOW TO CASH IN! If you want to sell your coins – any and all coins – for absolute top dollar, pick up the phone and call today to get your piece of the action and your share of the cash! Call collect and tell them you want to talk to the **King of Cash**.

To contact a SPECTRUM representative, call us collect at (949) 955-1250. Do it today!

Collecting & Enjoying Pattern Coins
A Series With Much Potential

by Q. David Bowers

Q. David Bowers, who this year is celebrating 50 years in professional numismatics, has studied and enjoyed pattern coins for many years. He has catalogued many of the most important collections ever formed, including those of Major Lenox R. Lohr, T. Harrison Garrett, Armand Champa, William R. Sieck, Rogers M. Fred, Jr., Louis E. Eliasberg, Sr., and others.

In this article, parts of which have been adapted from the forthcoming new 8th edition of Dr. J. Hewitt Judd's classic, "United States Pattern, Experimental, and Trial Pieces", *Dave shares some ideas concerning the pattern series.*

A New Pattern Book

For the past several months I have had the very enjoyable experience of "total immersion" in pattern coin research, essentially completely rewriting the Judd book, *"United States Pattern, Experimental, and Trial Pieces",* on behalf of Whitman Publishing Company. The venerable name of Whitman, with numismatic traditions going back to the 1930s under the aegis of Richard S. Yeoman, became a division of Western Publishing Company, then later of St. Martin's Press, and most recently was acquired by the Anderson family (owners of ANCO, America's largest newsstand and book distributor).

The project was a team effort in the finest sense, and involved Saul Teichman doing great field work and historical research ranging from essential information to interesting tidbits, with Bob Hughes computing the market prices of pattern coins in three different grade levels (something never done before), and with others including Andy Lustig, John Hamrick, Teresa Lyle, Mary Counts, contributing much. The result will be, I hope, a volume that will at once be enjoyable to read, informative, and useful.

A Market Paradox

Time was when the collecting of pattern coins was an obscure specialty, and few knew anything about patterns, except for the handful of pieces listed in the *Guide Book*. Paradoxically, the pieces with *Guide Book* listings include some of the *most plentiful* of all patterns, but because they are so well known, they are also among the most expensive!

The most obvious example is the 1856 Flying Eagle Cent, of which at least a couple thousand exist, making it "quite common" in the context of the pattern series, but for which a gem piece will sell for well over $20,000. Then there is the 1879 Flowing Hair $4 Stella, struck in Gold, of which hundreds exist, also quite plentiful in the terms of pattern rarity. However, the listing in the *Guide Book* has beckoned generations of collectors, and today just about any collector would give an eye tooth for a nice example of the 1879 $4 Stella, with more than $50,000 needed to buy a choice Proof and nearly $100,000 for a gem.

However, beyond the pieces listed in the *Guide Book,* there are over 1,800 other patterns from 1792 onward, some of which are sufficiently rare that years will elapse between offerings, and yet the market values are quite reasonable, such as just a few thousand dollars for a choice or gem Proof. The catch is that such pieces cannot be collected instantly. Instead, a great deal of patience is required, which, of course, contributes to the thrill of the hunt.

While I hope you will secure a copy of the eighth edition of the Judd book for your library, in the meantime here are some thoughts as to ways to collect patterns, perhaps one method being ideal for you or your customers:

Ways to Collect Pattern Coins

There is no one "right" way to collect pattern coins, and over the years many numismatists have developed their own formulas. While a handful of numismatists have had the time, patience, and finances to collect one of every pattern they could find, the most popular discipline is to acquire pieces that are numismatic favorites, either by design or part of related series.

Collecting with a Regular Series

Off-metal-strikes furnish an interesting addition to a collection of regular-series coins. Thus, a specialist in Liberty Head or Coronet $10 Gold coins of the late 19th century might well enjoy having a few strikings from Proof dies in Aluminum or Copper, rather than Gold. Similarly, a collector of Indian Head Cents might well enjoy owning an 1868 Cent struck in Aluminum (Judd-612), certainly an item that would cause great attention when shown to others.

For a long time many specialists in Flying Eagle and Indian Head Cents have found it a pleasant exercise to acquire related patterns, of which dozens of varieties exist. Indeed, sets of 12 different 1858 pattern die combinations became early stock in trade items for Mint officials. To these can be added the pattern Cents of 1859, the issues of 1864, and others.

Similarly, specialists in Nickel 5-Cent pieces can find a vast panorama of interesting and often available pattern coins produced from the general era 1865-1896, sometimes incorporating dies used for the Shield series (regularly struck 1866-1883) and the Liberty Head series (1883-1912), but often in combination with strictly pattern reverses never used for circulating coinage. As a microcosm, the pattern Nickels of 1881-1883 are a delightful study in themselves.

Collectors of Fractional Currency Paper Money, issued by the Treasury Department in the 1860s and 1870s, may find the Postage Currency pattern coins of 1863 to be of interest (J-325 to 330), as they are coins intended to be Minted for the redemption of the early issues of Fractional Currency, the early issues of which were called Postage Currency. However, such coins were never adopted for general use.

Numismatists who enjoy regular issue Half Dollars have often added a display of patterns to their cabinets, sometimes acquiring dozens of specimens. R.E. Cox, Jr., Texas numismatist and department store owner, did precisely that. Similarly, Morgan Silver Dollar specialists have a wide variety of 1878 and 1879 patterns to choose from. For aficionados of the Morgan head of Miss Liberty, there are also pattern Morgan Dimes, Quarters, and Half Dollars with the same portrait. How interesting it is to display a "**Morgan Dime**"!

Trade Dollars, first called *commercial* Dollars, were made to the extent of dozens of patterns during the period 1871-1873, plus a few scattered later issues, and form a fascinating complement to a

CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

regular collection. Harry W. Bass, Jr., loved regular-issue $3 Gold coins, and to go with them he endeavored to acquire every pattern coin he could find of the same denomination.

Transitional Patterns

Transitional patterns consist of pieces bearing obverse and reverse designs in the same combination as used for regular coinage, but dated before regular coinage commenced. These pieces in essence are pattern coins of which the designs **were** adopted.

The famous transitional is the 1856 Flying Eagle Cent (Judd-180), struck from the design adopted on February 21, 1857, but dated a year before, costing over $20,000 for a gem, as I noted earlier. The 1859 Indian Cent with the Oak Wreath and Shield reverse, or Type of 1860 (J-228), is another transitional, much rarer, but a gem is apt to cost only a couple thousand dollars or so! Then there is the 1863 Bronze pattern Cent (J-299), also inexpensive by comparison.

In the Shield Nickel series there are 1865-dated Nickels with the Shield obverse and With Rays and Without Rays reverse, plus the 1866 Without Rays, a suite of three coins which make a very nice addition to a regular set of this denomination. The 1882 Liberty Head Nickel Without CENTS (J-1690), is similar in design to that of the famous 1883 issue made for circulation and thus is a transitional pattern. Quarters, Half Dollars, and Dollars of 1863, 1864, and 1865 exist with the Motto IN GOD WE TRUST on the reverse, as regularly adopted in 1866.

Favorite Pattern Designs

Perusing through this or another text on patterns will acquaint you with many different designs, some of which may be attractive to your eye, some which may not be.

Among patterns that have been collected simply because they are beautiful and interesting to own are such issues as the 1872 "Amazonian" Quarter, Half Dollar, and Dollar; the elegant series of 1877 Half Dollars; 1879 "Schoolgirl" Dollar; and the 1882 "Shield Earring" Quarter, Half Dollar, and Dollar, among many others.

At the Eliasberg Collection sale I recall that a bidder set his eye on just one pattern, as it had a story (yet another reason to acquire a favorite pattern), the "ugly duckling" Three-Cent piece of 1849 (J-113 and 114), depicting on one side simply a 3 and on the other the Roman numeral III.

Other Sets and Specialties

Patterns themselves offer the opportunity to form sets and subsets of pieces of interest. Here are a few suggestions beyond those already mentioned:[1]

Denomination Type Set: One of each pattern denomination in the *regular denominations* from the Half Cent to the $20 or, if you are bold, include the pattern-only denominations of the $4 Stella and 1877 $50. Metals of striking can be mixed or matched. A complete denomination set would include the Half Cent, Cent, 2 Cent piece, Nickel 3-Cent piece, Silver Trime, Half Dime, Nickel 5-Cent piece, Dime, 20-Cent piece, Quarter Dollar, Half Dollar, Silver Dollar, Trade or commercial Dollar, Gold Dollar, $2.50, $3, $4, $5, $10, $20, and $50.

Year Set: Pick a favorite year and endeavor to obtain as many different patterns as possible, either in terms of die combinations, or simpler, an example of each individual die.

Coins From An Era: Patterns from the Civil War era 1861-1865 may form a specialty. Or, patterns from the era of the great "Silver Question" of political importance, the 1870s through the 1890s, when Silver (in particular) became a political hot potato, but with Gold advocates and Paper Money adherents each voicing his or her own opinion. Or, coins from a particular presidential administration might be a challenge.

Favorite Engraver: Concentrate on patterns from the hand of a favorite engraver—Christian Gobrecht, James B. Longacre, George T. Morgan, *et al.*, and collect examples of his work, adding to your enjoyment by learning of his life and background.

Standard Silver Set: Review the Standard Silver listings of 1869 and 1870, with a few of 1871. Assembling an example of each die pair can be a fascinating challenge. Or, you can focus upon certain issues and obtain suites of six of the same pair (Silver, Copper, and Aluminum, each with Reeded or Plain Edge).

"Story" Coins: Form an exhibit of patterns with emphasis on the odd and curious—design mistakes as on the 1875 20-Cent piece and Trade Dollar with illogical ship illustration, or two-headed coins, or ??? There are many possibilities.

Collecting and Enjoying Patterns

In summary, people collect patterns because they enjoy owning them, there being no rules as to the best way to form a display. Most series of patterns contain pieces that are readily available as well as others that are unique or will not be found during a collector's lifetime. Thus there is the thrill of the chase for the latter. No one has ever completed a full set of 1877 pattern Half Dollars, although a number have tried, and a good "score" is to get at least 10, with 15 or more being truly remarkable. Picking up a familiar analogy, it is like playing a round of golf—no one ever gets a perfect score of 18, but it is fun to try, and a score in the 80s or even the 90s can be a worthy accomplishment.

A comforting aspect of collecting patterns is their inherent value: All patterns are scarce, many are rare, and many others are exceedingly rare. However, as the vast majority of American numismatists do not know of the series, it is possible to obtain coins for which only a half a dozen or a dozen pieces exist for prices that are but tiny fractions of the cost of varieties listed in the *Guide Book*.

Perhaps this article will stimulate *you* to learn more! If so, a fascinating and thoroughly enjoyable experience awaits you, plus the opportunity to acquire *great rarities* for what I believe to be incredibly attractive prices.

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. **Must** have eye-appeal.

MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

UNITED STATES PATTERN COINS AND EXPERIMENTAL/TRIAL PIECES

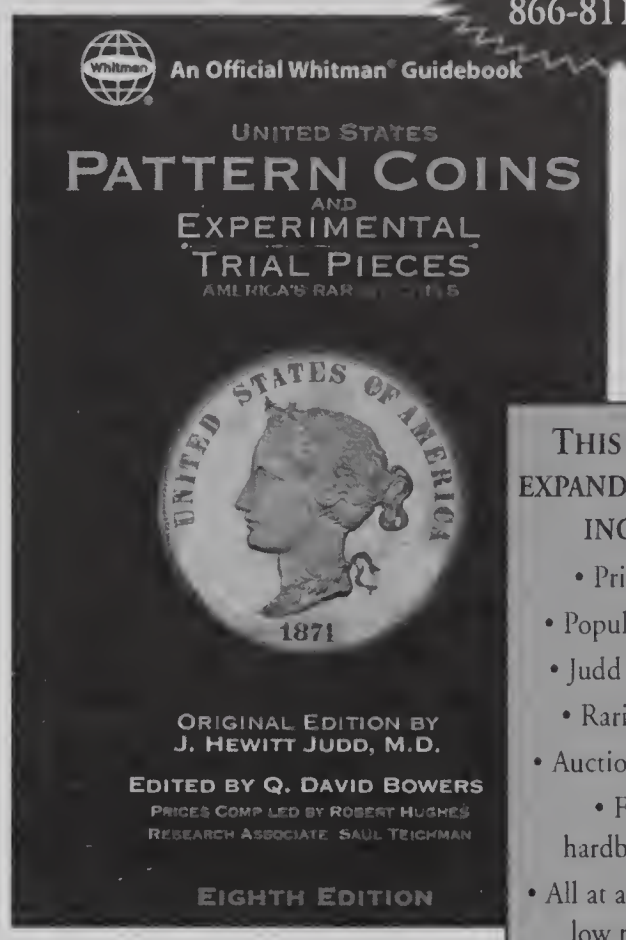

AMERICA'S RAREST COINS • NEW 8TH EDITION

Edited by Q. David Bowers

Prices compiled by Robert Hughes • Research associate: Saul Teichman

FOR THE FIRST TIME IN OVER 20 YEARS a popularly priced book on patterns is available. For the first time *ever,* a book on patterns gives current and estimated market prices in three different grades. This book, a virtually complete redo of the Judd text, will be your passport to buying, selling, and enjoying this exciting series—brought to life with completely new text by Q. David Bowers, and contributions by some of America's foremost scholars and numismatists. Every effort has been made to create a book that you will find instantly useful and will refer to time and again. There has never been anything like it!

BUT, you can receive this book at our special pre-publication price of only $25 plus $5 shipping. Order now while supplies last. Call Melissa Karstedt today at 866-840-1913 to reserve your copy. It will be shipped to you immediately upon publication, scheduled for July 2003.

THIS NEW AND EXPANDED EDITION INCLUDES:

- Price updates
- Population reports
- Judd ID numbers
- Rarity numbers
- Auction appearances
- Full-color hardbound cover
- All at an unbelievably low retail list price of only $29.95 plus $5 shipping.

Coin Market Booms & The Importance Of Gold

by Richard N. Nachbar

Sometimes an internal factor can so influence a market that customary supply and demand relationships are temporarily thrust aside. The advent of professional third party coin grading in 1986 is often pointed to as having had one such major impact on the U.S. rare coin marketplace. The resulting explosion in demand propelled high grade coin prices to a peak in mid-1989 that today is often looked back upon in awe for the record prices and volume set. That **certified coin boom** left such a high watermark that many coin prices today are still only 10% to 30% of the Bid quotes posted in the June 2, 1989 *Certified Coin Dealer Newsletter - Bluesheet.*

A more recent internal phenomenon has been the focus of demand on those certified coins that qualify for placement in **registry sets** of the more popularly collected U.S. coin series. Although this market subset presently continues to set incredible price records month after month, veteran observers believe that this too will pass, leaving behind a legacy to be analyzed in similar awe for years to come.

The largest coin market boom of all time, however, was set in motion by an **external** factor, and for good reason is the focus of this article today. Coin shows were never so crowded. Demand was never so broad-based and price increases were never so rapid. If it was round and shiny, it had to be MS65. If it didn't have any wear, then it was probably MS67! *"Did I hear only triple Bid? Please step aside, sir. The gentleman behind you would like to see that coin."*

Yes, that was of course the **Gold boom** market of 1979-1980. World Gold markets began 1979 at $227 per ounce, passed $300 in July, then $400 in October, $500 in December, then $600, $700 and $800 in January 1980, reaching a closing basis high on January 21, 1980 of $850 per troy ounce. Some of today's leading national coin dealers first opened a bourse table during that boom. Gold prices averaged $615 in 1980. It was a glorious market. Everything went up. Dealers made money, the public made money, collectors and investors made money, and then in 1981 it ended.

Optimism resurfaced from time to time in subsequent years as Gold vacillated between $300 and $500. Everyone longed for a return of the boom, but instead a massive bear market ensued. Significantly, it was the very excesses of the Gold boom that brought about the creation of third party grading and rare coin certification and its smaller boom in 1989-1990, mentioned earlier. The subsequent final collapse of certified coin prices in 1991 left the coin market exhausted and clearly without leadership, as bullion continued its inexorable decline, drifting down under $300 and staying there for several years. Nothing, it seemed, would resuscitate the coin market back to its more thrilling past.

With little fanfare and most market participants looking in other directions, **the 21 year Gold bear market ended in April 2001 at $255.** Overhead resistance at $300 was cleared in March 2002, and $350 fell in January 2003, just before the FUN show. Many wondered if a new coin boom would get underway in 2003. By the time the dealer bourse opened in the Orange County Convention Center on the afternoon of January 8th, any doubts about the strength of the U.S. coin market were quickly dispelled. A new boom was on and smiles were seen throughout the show as participants paused to catch their breath between non-stop transactions.

Evidence of a New Coin Boom

In August 2001, shortly after Gold had bottomed out, bullion was trading up 10% at $275 per ounce. Quantities of U.S. Double Eagles were all over the bourse floor at the ANA's summer convention in Atlanta. Uncirculated $20 Liberties were Bid at $300 and Unc $20 Saints were Bid $305. Certified Saints were Bid $320 in MS62, $335 in MS63, $390 in MS64 and $675 in MS65. Supply vastly exceeded demand and dealers could be very fussy filling orders. Spotted and ugly coins traded at discounts or did not trade. Overall volume was not exceptional and to most participants, it was business as usual.

During January of this year, however, all that was turned around. Demand for U.S. Gold was overwhelming the supply. Dealers large and small from all over the country had 100-piece orders to fill. The major wholesalers fanned out across the bourse floors in Orlando and then Long Beach, looking to purchase U.S. Gold. Like a giant vacuum cleaner, their buying pulled in everything that wasn't already nailed down: raw Gold, certified Gold, Double Eagles and small Gold. Even ugly and spotted coins were sucked up by their voracious demand. Orders were coming out of the woodwork and volume swelled to the highest in a decade.

By the first week of February, spot Gold was trading at $375 and U.S. Gold was white hot. Uncirculated Double Eagles were Bid $450 and certified Saint Bids had jumped to $485 in MS62, $525 in MS63, $660 in MS64 and $1,200 in MS65.

$20 SAINT-GAUDENS BID PRICES

MONTH	YEAR	MS60	MS62	MS63	MS64	MS65
AUG	2001	$305	$320	$335	$390	$ 675
FEB	2003	$450	$485	$525	$660	$1,200
GAIN		+47%	+51%	+56%	+69%	+77%

More significant than the increased Bid prices were the **liquidity effects** on the entire U.S. rare coin marketplace. Since virtually all U.S. coin dealers routinely stock dozens to hundreds of U.S. Gold coins in their inventories, those rapid January sales returned significant amounts[1] of **working capital** to dealer checking accounts, along with much greater than expected profits. Money sitting around in a checkbook will cost many a dealer important market share, so those funds had to be deployed, and quickly. And what do coin dealers like to spend their money on? What they know best, of course - their specialty, **rare coins**!

And spend they did! From the local neighborhood coin store picking up a few more circulated 1877 Indian Cents, 1909-S VDB Lincolns and 1893-S Morgans, to the national show circuit dealer's Bidding furiously for $10,000 and up rarities at the major coin auctions, this macroeconomic **trickle-up effect** soon became a torrent. Cash and profits from Gold lit a fuse and now the entire U.S. coin market is flush with liquidity, increased demand and rapid transaction volume.

If a $125 increase in the price of Gold from $250 per ounce to $375 per ounce could have that kind of an impact, then it would be incumbent upon all interested parties to determine what today's prospects for Gold really are. Is another $125 increase over 18 months to $500 per ounce in store, or will Gold disappoint and fall back to under $300? Gold trading above $500 by 2005 is, in my opinion, the more probable course. Here's why.

Golden Fundamentals

Gold is money. Too many people have forgotten that since 1980. A steady barrage of negative Gold commentary from the paper currency camp has sought to blur that distinction. Yet the truth of the matter is plain as day for all to see - if they will only look. Gold is money because for thousands of years people all over the world have preferred it that way. No legal tender decree or edict was required. It has been, still is and will continue to be the currency of choice.

Webster's New Universal Unabridged Dictionary, published in 1976, in its listing of *"currency"* has a sub-listing as follows: *"paper currency: paper issued as a substitute for money."* That is the point. Paper is just a substitute, temporary at best. The term *paper money* is an oxymoron. Every single paper currency issued since the Chinese invented it thousands of years ago has dropped in value to zero. There are no exceptions. The paper currencies in circulation around the world today are all traveling that same course, some more quickly than others. The *U.S. Federal Reserve Note*, by official U.S. government accounting, has lost 95% of its value (purchasing power) since its inception in 1914. Today, if one will just take a step back and observe, we are experiencing the **final destruction of those last 5 cents.**

How did the once great U.S. Dollar get into this situation? In 1944 in anticipation of military victory in Europe and the Pacific, the Allied powers sent key men to the **United Nations** Monetary and Financial Conference in Bretton Woods, New Hampshire, to hammer out a new post-war economic order. Here the **International Monetary Fund** was created and the U.S. Dollar was granted unique status as a **global reserve currency.** By official

1 - This cumulative external liquidity injection from new orders was probably in the tens of millions of dollars, similar to but less than the Kidder Peabody Merrill-Lynch and Shearson infusions for certified coins in early 1989.

MONTHLY SUPPLEMENT

COPYRIGHT 2003 COIN DEALER NEWSLETTER, A DIVISION OF CDN INC.
Reprint of any issue without permission is expressly forbidden by law.

EXECUTIVE DIRECTOR Pauline Miladin
EDITOR Keith M. Zaner
PUBLISHER Shane Downing
CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or Raw (uncertified) but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

decree, the Dollar was declared to be as good as Gold. Member nations were advised to accumulate U.S. Dollars in their treasuries along with the usual bars of Gold bullion, then valued at U.S. $35 per ounce.

The problem with this new arrangement became readily apparent during the 1950s. The U.S. economy kept "purchasing" more goods from abroad than those nations were purchasing from the United States. Payments for the valuable goods produced in other countries and exported to the U.S. were made with Federal Reserve Notes, which began to excessively accumulate in foreign corporate and official treasuries. By 1959, total U.S. Dollars held abroad exceeded the total value of all U.S. Gold reserves and foreign monetary officials became increasingly restless. Several began to return those U.S. Dollar "reserves" to the U.S. Treasury and claim U.S. Gold instead. Gold began to flow out of the U.S. in a hurry. In 1960, the London free market Gold price reached $40 and a monetary crisis was brewing. So, in 1961, the U.S. convinced several European central banks to join them in forming the **London Gold Pool** as a Gold price-depressing device.

By the middle 1960s, the Gold Pool was losing over 1,000 metric tons per year (1 metric ton = 26,400 troy oz.) by trying to defend the Dollar and depress the price of Gold. The French Treasury, rather than risk the loss of their own Gold reserves, read the writing on the wall and withdrew from the Gold Pool in June 1967 and became major buyers of Gold with their surplus dollars. A staggering 3,500 tons of U.S. Gold (20%) was used over the next 5 months to prop the U.S. Dollar, but the effort failed. The other European central banks soon followed the French example. On March 14, 1968, the Gold Pool lost 400 tons of Gold to private buyers and President Lyndon Johnson - at the request of the Federal Reserve Bank and U.S. Treasury - asked the Bank of England to close the Gold Pool operation.[2] Private world Gold buyers were now shut out from redeeming their U.S. Dollars for U.S. Treasury Gold. Foreign *governments*, on the other hand, continued to lay claim to U.S. Gold reserves and took increasing deliveries of bullion until President Richard Nixon closed the U.S. Gold window on them on August 15, 1971.

CENTRAL BANK GOLD RESERVES IN METRIC TONS

COUNTRY	1960	1970	DECREASE	PERCENT
United States	19,268.4	11,980.5	7,287.9	37.8%
United Kingdom	3,031.4	1,460.0	1,571.4	51.8%
TOTAL	**22,299.8**	**13,440.5**	**8,859.3**	**39.7%**

To rein in the price of Gold and halt the collapse of the U.S. Dollar, the U.S. and U.K. collectively dumped almost 9,000 tons of their Gold (40%) during the 1960s (see table). When the Dollar continued its decline in the 1970s, Gold rallied 400% to $200 in 1974, corrected to $100 in 1976, then rocketed over 700% to $850 in 1980. Highly publicized official sales of U.S. Treasury Gold and IMF Gold could not hold it back, so stronger measures were taken. Federal Reserve Board Chairman Paul Volcker ran U.S. Dollar interest rates up to 20% in 1980 to draw Dollars back into banks and stop the run to Gold. At the expense of the U.S. economy, rates were kept high until Gold broke down and fell back to the $300 area.

New Derivative Gold Pool

No lessons were learned, however, and U.S. red ink continued to flow. Trade and current account deficits accelerated in the 1980s and 1990s, so new methods of subterfuge were devised. A *new era* was declared and new financial tools called derivatives[3] were increasingly employed. If you think Enron employed aggressive accounting, wait until the true story comes out on U.S. and IMF Gold.

2 - The War on Gold (publisher '76 Press) by Professor Anthony C. Sutton, page 111.

3 - Warren Buffet in his March 3, 2003 *Fortune* magazine article, referred to derivatives traded today as "**time bombs**" and "**financial weapons of mass destruction**." Derivatives foster a **pyramiding of debt** which often ends in ...

Under the guise of a **Strong Dollar Policy**, in 1995 the Clinton Treasury Department continued to deliver official Gold reserves into the cash markets to depress Gold's price. But instead of calling it a **sale** of Gold, they labeled it as a Gold **loan**, a Gold **lease** or a Gold **swap**. The Gold left the official vaults and was consumed as jewelry, electronics or dental fillings. That Gold is physically gone. But it is still being counted on the official books as reserves, with "Gold and Gold Receivables" being lumped on one line. Gold industry "spokesmen" will now admit that 4,000 - 5,000 tons of official Gold has been loaned, leased or swapped into the physical market. But independent analysts have recently shown from three separate lines of evidence that **these Gold loans are actually in the range of 15,000 - 16,000 tons.** Since official Gold reserves for **all** central banks as of February 3, 2003 allegedly total 32,054 tons[4], that means that fully **one half of the declared Gold is gone.** As more and more individuals become aware of these facts, the rush to Gold will move out into the open.

Recent Developments

On February 5, 2003, with no precedent and no warning, margin requirements were raised 50% on all Comex traded Gold futures contracts.[5] Participants had less than 24 hours to wire in the additional margin or be closed out. This stopped Gold's recent rally at $375 and fostered uninformed selling that quickly brought Gold back to $325. As this article goes to print on July 3, 2003, spot Gold is right at $351.

So what is the lesson in all this for the coin community? Gold's recent managed setback is a gift of price and time. Time to do your own homework and to test out whether the above statements are factual, contrived or worse. Supporting graphs and tables for this article can be found at my website, www.coinexpert.com. The Internet offers many wonderful sites for research, such as the historical Gold charts from the 1970s at www.kitco.com, and the guest articles and daily commentary posted at www.lemetropolecafe.com, where Gold Anti-Trust Action founder Bill Murphy offers a free 2 week trial subscription. Educate yourselves quickly during this opportunity and **educate your customers**.

If Gold is actually in the early stages of a multi-year bull market, then use these dips to buy Gold coins. Be fussy. Negotiate your best deal. Buy, then hold, then add more on the next sell-off. But make sure you take immediate physical delivery. Gold bullion coins and U.S. Double Eagles are excellent trading vehicles with low transaction costs and highly transparent pricing. They can easily be **traded in** when that great, premium quality, low-pop rarity you've been tracking down for months suddenly appears.

Finally, dealers, remember that less than 5% of the U.S. general population has ever purchased a Gold coin. As an industry, you are in a unique position at present to provide the other 95% with Gold coins when they begin calling. Are you ready?

4 - World Gold Council, latest statistics.

5 - Heavy-handed official intervention into and "management" of Gold's free market pricing is becoming increasingly evident across the globe. This abrupt margin increase was portrayed as necessary to dampen volatility. Yet, during the same month, crude oil, heating oil and natural-gas futures displayed much greater volatility (on February 24, 2003, natural-gas March futures climbed 40% in one day!) Yet there were no similar increased margin requirements for these products. Consider also that only Gold's Comex trading hours are not back to their pre-September 11, 2001 trading period. Almost two full years later, Gold's "managers" continue to close that market one hour earlier each day, for greater control.

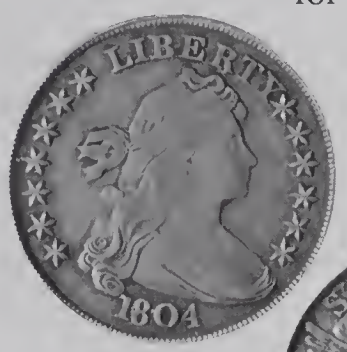

Bowers and Merena Galleries presents...

The Official 2003 Baltimore ANA Auction

July 30-August 2 • Baltimore, Maryland
In conjunction with the 2003 Baltimore ANA Convention

To receive your copy of the superbly illustrated 2003 Baltimore ANA Auction Grand Format™ catalog, the *Coin Digital*™ catalog interactive CD and *Crown 100*™ video with the top 100 coins to be auctioned (each described in detail by a renowned numismatic expert), call toll free **888-337-4492**. The Catalog, CD and video are all yours for only $25. The coins pictured here present a tantalizing preview of the items to be auctioned.

For information on consigning to a Bowers and Merena Galleries auction event, call Mark Borckardt or Paul Montgomery at 800-458-4646.

1804 $1 PR-58 (PCGS). *An opportunity to add your pedigree to one of the great American coins.*

1911-D $2½ MS-65 (PCGS). *A very elusive Quarter Eagle in any grade; only three graded higher.*

1907 High Relief Wire Edge MS-67 (PCGS). *Often called America's "Most Beautiful Coin," only four graded higher.*

Mike Fuljenz KNOWS The *REAL* Value Of Your Coins... DO YOU?

YOUR FREE PROFIT BOOSTER KIT INCLUDES:

1. ***INSIDER'S GUIDE TO U.S. COIN VALUES –*** This 223 page national price guide, published by Bantam Doubleday Dell, shows you the fair market value of virtually every U.S. coin from half cents to gold coins (a $5.00 value).

2. ***TYPE III DOUBLE EAGLES 1877-1907 –*** This is Mike Fuljenz's award winning Year 2000 NLG Investment Book of the Year. A complete 190 page guide to buying and selling these American treasures and much more (a $29.95 value).

3. ***A COLLECTOR'S GUIDE TO INDIAN HEAD QUARTER EAGLES –*** A Year 2001 NLG Book of the Year Award-Winner with complete listings and price information on this historically unique "incuse" design coin (a $19.95 value).

4. ***THE TOP COINS FOR 2002 –*** Two of Mike's top picks 2000 are already up over 60% (a $9.95 value).

5. ***HOW TO SELL YOUR COINS AT MAXIMUM PRICES*** (a $9.95 value).

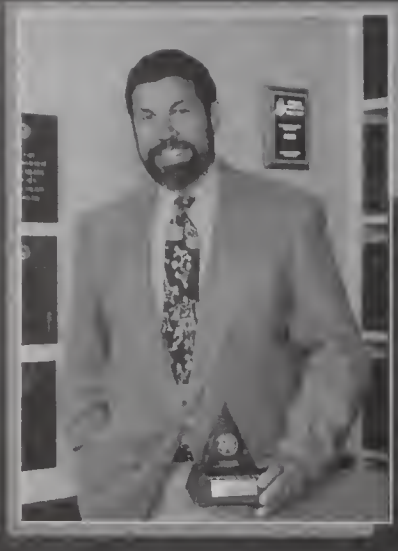

6. ***WHY ALL YOUR IMPORTANT RARE GOLD, SILVER, & PLATINUM COINS SHOULD BE CERTIFIED!*** A hard-copy of Mike's 2002 NLG Award-Winning Article (a $9.95 value).

7. ***HOW TO PUT YOUR COINS IN AN IRA*** (a $9.95 value)

8. ***TEN QUOTES*** on coins you already own (a $10.00 value).

9. ***ONE FULL HOUR OF MIKE FULJENZ'S TIME*** To ask specific questions about coins you either own or want to buy. For 18 years, the prestigious American Numismatic Association consulted Mike Fuljenz to teach their seminars on precious metals and rare coins. Now you can too (a $295.00 value)!

10. ***A FIVE-YEAR SUBSCRIPTION TO MIKE FULJENZ'S SIX-TIME NUMISMATIC LITERARY GUILD (NLG) AWARD-WINNING NEWSLETTER INVESTOR'S PROFIT ADVISORY –*** Every issue tells you where the market for gold, silver, and rare coins is going–and how you can profit from it. You'll learn about factors creating market volatility, and price escalation for precious metals and rare coins (a $250 00 value).

ONLY **$8** *A $650 VALUE FOR JUST THE COST OF PRIORITY SHIPPING*

Michael R. Fuljenz is an unprecedented 23-time national award-winning reporter in his field, and the 2000 TV Reporter Of The Year for his CNBC appearances with Ted David. He is also a past recipient of the American Numismatic Association Presidential Service Award, and is the President of Universal Coin & Bullion Ltd.

MIKE FULJENZ'S award-winning Year 2003 Profit Booster Coin & Bullion Kit will reveal to you what your coins are worth now and teaches you how to maximize their value when you sell. It will give you all the "inside track" information you need to learn how to:

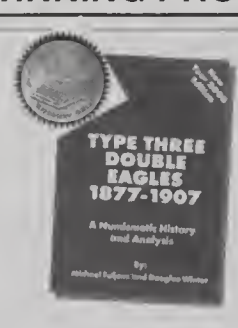

- **Buy or Sell Certified Gold and Silver Coins Without Getting Ripped Off**
- **Put Coins In Your IRA**
- **Strategically Build a Precious Metals Portfolio of Exceptional Quality & Value**

Despite a roller coaster stock market, we can show you how to diversify into a proven area of stability and performance.

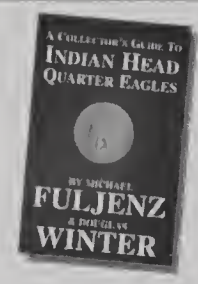

THE AWARD-WINNING PROFIT BOOSTER KIT INCLUDES:

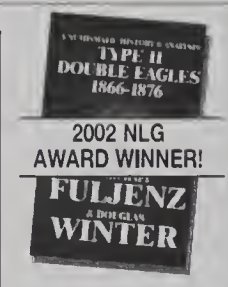

231 Page Random House Dell Price Guide

Year 2000 NLG Investment Book Of The Year!

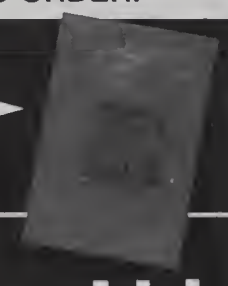

Year 2001 NLG Book of the Year Award-Winner!

FREE BONUS BOOK! Brand New Edition Type II Double Eagles

YOU SAVE $650! The entire Year 2003 Profit Booster Kit is **ONLY $8.00**, which simply covers the cost of Express U.S. Mail delivery. **Call TOLL FREE (800) 459-2646** this month to order and you will receive a **FREE BONUS BOOK** - the Year 2002 Edition of Mike's essential price guide *Type II Double Eagles: 1866-1876*. This 95 page price guide is yours **ABSOLUTELY FREE** with your order this month! Why such an incredible offer? Because, Mike Fuljenz wants you to know the *REAL* value of your coins, in order to establish a mutually beneficial relationship built on honesty.You are under absolutely no obligation to buy anything from Mike Fuljenz, ever! **CALL RIGHT NOW TO ORDER!**

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.

MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

* Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

RARE GOLD

If you are a marketer of rare United States Gold coins and you do not receive my wholesale price list, you may be costing yourself money.

I'm one of the largest wholesalers of rare United States Gold coins in the world. I have over twenty years experience in wholesale gold coin sales.

Each week, I put out a "user-friendly" inventory list which contains over $1 million of choice, fairly priced rare U.S. Gold coins.

I specialize in PCGS and NGC graded U.S. Gold coins struck from 1795 to 1900 in Very Fine to Mint State grades.

Comprehensive support material is available. I can increase your sales and make it easier for you to sell rare U.S. Gold coins.

BUYING ALL BETTER DATE GOLD ESPECIALLY WANT THE FOLLOWING TWENTY DOLLAR GOLD PIECES

1850–1876 TWENTY DOLLAR AU 53 – MS 65
CARSON CITY 20 DOLLAR AU 53 – MS 63
ALL SLIGHTLY BETTER DATE 20 DOLLAR MS 62 OR BETTER

If you would like to be put on my mailing list or receive my regular fax list, PLEASE CALL.

MS 70

"You'll love this stuff!"

Industrial Strength Coin Brightener

Proven for years as the INDUSTRY STANDARD used by professional numismatist and collectors alike world wide to restore **mint state** and **proof** coins to the bright - white brilliance that they exhibited the day they were minted! Developed by renowned chemist Gayl Swinehart, PhD.

Contains No Acids or Solvents Environmentally Friendly

Safe on Gold - Silver - Nickel Copper - Bronze - Brass

WILL NOT GIVE YOUR COINS THAT "DIPPED" LOOK

MS70 does not change the color of your coin but does remove the tarnish and surface contamination allowing the natural beauty of the original surface to show as bright as the day your coin left the mint. Surface contamination is p.v.c., tarnish, fog, oil, dirt, ect. **MS70** is a blend of industrial detergents and surfactants designed to remove surface contamination from metal without disturbing the metal surface itself.

When **MS70** is applied the surfactants (wetting agents) first break the surface tension of the contamination then the detergents is **MS70** go to work as you "work" the coin as directed on the label instructions by suspending the contamination so that it may be rinsed away leaving a bright metal surface as undisturbed as the day the coin was made.

MS70 IS AVAILABLE IN MOST COIN SHOPS OR YOU MAY ORDER BY CALLING WITH VISA OR MASTERCARD OR SEND $7.95 PLUS $3 POSTAGE TO:

Carson City Silver Dollars

by Bryan Sonnier

A History as Tumultuous as That of the Morgan Silver Dollar Itself

March, 1964. Day after day, long lines of anxious coin buyers form outside the Federal Reserve Building in Washington, D.C. Each is hoping that his $1,000 purchase of an unopened bag of 1,000 U.S. Silver Dollars will result in what amounts to a modern day treasure trove worth many thousands of dollars.

The outpouring of Silver Dollars from the U.S. Treasury continues at a staggering pace until it is finally brought to a halt on March 26, 1964. On that day, the Secretary of the Treasury, C. Douglas Dillon, suspends the exchange of Silver Dollars for Silver Certificates. Americans can no longer use their greenbacks for the one-to-one purchase of Silver Dollars from the Treasury!

What had brought us to this important event in the history of the U.S. Silver Dollar?

From its beginning, the U.S. Silver Dollar was the focus of fierce battles between politicians representing western Silver mining interests and those promoting Gold as our monetary standard. Throughout its checkered history massive production of the coins was interspersed with the melting of millions of pieces to finance war efforts or for international Silver sales to our allies. For its part, the general public had little interest in using the coin in daily commerce due to its size and weight. In fact, after their mintage, most Silver Dollars were simply bagged and shipped to Washington for storage. At times, the stock of Silver Dollars sitting in Treasury vaults reached into the hundreds of millions.

Despite a decided lack of interest in the coins on the part of the general public, there were those who enjoyed collecting Silver Dollars. The coins were also popular as Christmas gifts and were therefore often released in bag quantities to banks around the country in the months leading up to the holiday. It was the result of one of these pre-Christmas releases that the history of the Morgan Dollar was changed forever.

During the late 1950's and early 1960's, most Mint State Morgan Silver Dollars traded among collectors for a small premium over face value. However, there were a few rare dates thought to have been mostly lost in the Silver melts of previous decades and these traded at prices of several hundred dollars or more. One date, the 1903-O, was considered to be a major rarity and if one was lucky enough to ever have an opportunity to buy one, he could expect to pay a whooping $1,500 for a Mint State example! Most major coin dealers of the day had never even seen a Mint State example of this date much less had the opportunity to own or handle one.

In November of 1962, the U.S. rare coin market was rocked by almost unbelievable news. Several dates previously considered exceedingly rare were discovered in bag quantities during the annual pre-Christmas release by the Treasury. Among those dates was the much-desired 1903-O! Obviously, after the release of this key date in bag quantities, its lofty price adjusted quickly to the new market realities. However, the die was cast.

Overall interest in Morgan Dollars skyrocketed, and with the publication of the news that important rare date coins were being released from the Treasury vaults, the rush was on. Now, after putting a stop to the unprecedented run on the Treasury's holdings, auditors would soon discover that the remaining stock consisted of only about 3,000 bags of Uncirculated coins, mostly from the Carson City Mint.

While the rare coin market digested the many thousands of bags of newly-released Silver Dollars, the politicians set about trying to decide how to liquidate the remaining Treasury holdings of nearly 3 million Silver Dollars. Almost every idea imaginable was discussed including the melting of the coins for sale as bullion! Fortunately, this outrageous idea was scrapped. After many years of debate, it was decided to sell the coins to the general public through a series of mail-bid sales to be conducted by the General Services Administration, or GSA. It was believed that this would be a fair and equitable manner in which to distribute the coins to U.S. citizens.

President Richard M. Nixon signed a bill on December 31, 1970 authorizing the sale of the Treasury's holdings of Silver Dollars and on December 6, 1971, official custody of the coins was finally transferred to the U.S. Bullion Depository at West Point, NY where the GSA accepted trusteeship. After nearly a year of counting, sorting, and packaging of the coins by the GSA staff, the details of the first mail-bid sale were finally released on October 31, 1972.

A series of five sales of the Carson City Silver Dollars were held with the final sale closing on June 30, 1974. Despite a massive advertising campaign on the part of the GSA, the Silver Dollar sales were definitely met with lukewarm interest and poor results. Anticipating much greater demand than actually realized, the GSA had stipulated that each customer could purchase only one example of each date represented in the sale. While dates such as the 1879-CC, 1890-CC, and 1891-CC quickly sold out, most others went begging.

When the dust finally settled on that last sale of 1974, nearly one million of the Carson City Silver Dollars remained unsold!

As one might expect with a governmental promotion the size of the GSA sale, critics were numerous and quite outspoken. Many coin dealers were angered with the notion that the U.S. government was "now in the coin business". Some complained that the coins were being promoted to buyers with limited numismatic experience and that with the minimum Bid prices offered by the GSA, most buyers would be 'buried' in the coins. One prominent New York City coin dealer even petitioned the Securities & Exchange Commission to investigate claims in GSA sales literature that the coins represented 'a sound investment'. At that time, coin dealers were discouraged from using such claims in their promotional literature.

The issue of the remaining coins lay dormant for a number of years until it was again brought before the U.S. Congress in early 1977. Finally, in March of 1979, legislation was signed into law by President Jimmy Carter authorizing the GSA to sell the remaining Carson City Silver Dollars still in its possession.

In July of 1979, the GSA announced preliminary plans to offer the nearly one million remaining Carson City Silver Dollars in another round of mail-bid sales set to begin in early 1980. Along with this announcement, the GSA commented that over 25,000 requests for information had already been received from interested parties. A September press release noted that interest was running extremely high with over 130,000 post card requests from collectors to be added to the GSA mailing list.

All indications were that interest in the upcoming mail-bid sale would be unlike that of any other to date. Remember the sales of the 1970's? Only 1 coin per date per customer had been allowed. How would the GSA allocate coins in this sale? Amazingly, despite the

CIRCULATION & ADVERTISING Betty Morris

The **CDN MONTHLY SUPPLEMENT** is a supplement to the weekly **COIN DEALER Newsletter** (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified) but the grading **MUST ADHERE** to the current reading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The **CDN** may not change Bid just because a dealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly **CERTIFIED COIN DEALER Newsletter** (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

indications of strong Bidder interest, the GSA set the minimum number of coins per Bidder at 500!

During November of 1979, the GSA released formal sales literature and even included pre-sale minimum Bid prices for the upcoming sale. For those of us who remember late 1979 and its relevance to the rare coin market, this period was represented by extreme price volatility in the Silver market. Was it wise for the GSA to be publishing pre-sale minimum Bid pricing so far in advance of the actual sale? Well, one can guess the outcome.

On January 2, slightly more than a month before the announced sale date of February 8, 1980, GSA Commissioner Ray Markon was forced to retract those pre-announced Bid prices "due to volatility in the Silver market". Buyers were instead instructed to call a toll-free number that would be activated once the Bid process opened in order to get an up-to-the-minute minimum Bid price for the coins being offered. However, the damage had been done. Many Bidders, using order forms with previously-published incorrect minimum Bid prices, would later under-Bid on dates of their choice.

As if changing the published minimum Bid price weren't maddening enough, the GSA had yet another surprise in its bag of tricks. On February 21, thirteen days after the commencement of the Bidding process, the GSA announced that it was going to change the minimum number of coins allowed per Bidder. Due to unexpected demand, and in order to allow for a more equitable distribution of the remaining Silver Dollars, only 35 coins per customer, not 500 per customer as originally advertised, would be allotted to each Bidder.

Many Bidders ended up with no coins at all and I've often wondered if those who mailed their Bids in early with a requested minimum greater than 35 coins were not excluded altogether. Reaction was swift, and predictable. Complaints poured into local and national newspapers, industry-related magazines and periodicals, and most importantly, into the U.S. Congress. Even before the final sale in July of 1980 disposed of the remaining Carson City Silver Dollars in the GSA's possession, hearings before the U.S. Congress were already being planned in Washington. While the sales of the 1970's were marked by a decided lack of interest on the part of the buying public, the GSA sales of 1980 can only be described as chaotic.

THE GREAT GSA CRACK-OUT

As quickly as the first GSA CC Dollars were mailed to winning Bidders, they began to appear at coins shows around the country. And if history does indeed repeat itself, then the GSA CC Dollars were due for much more tumult.

I've asked numerous dealers about their experiences with GSA CC Dollars in the years immediately following their release for public Bidding. Many commented that they believed the coins, housed in their original GSA holders and boxes, were simply too bulky to transport to shows or to store easily at their shops. They preferred to carry their inventory in double-row boxes, each coin housed in a flexible plastic "flip" or in plastic tubes each holding twenty coins. And besides, so many of the coins were entering the marketplace that they carried no noticeable premium in their original GSA holders.

It was often said that the sound of the coins being "whacked out" of their GSA holders could be heard across the bourse floor at major shows as dealers prepared to pack their inventory. One dealer told me of seeing trash bins filled with discarded GSA cases at the end of major shows.

However, in my opinion, no single event since their release has had a greater impact on the population of GSA coins in their original holders than the introduction of third party grading and encapsulation.

When PCGS and NGC introduced their grading services during the mid 1980's, the rare coin marketplace changed dramatically. Dealers and collectors alike quickly accepted the innovative ideas of the two companies. But, in order to receive their grade and other company-offered guarantees, both companies required that a coin be encapsulated in their tamper-resistant plastic holders. As if that weren't bad enough news for GSA CC Dollars, other, more subtle factors combined to put additional pressure on the remaining population of GSA coins.

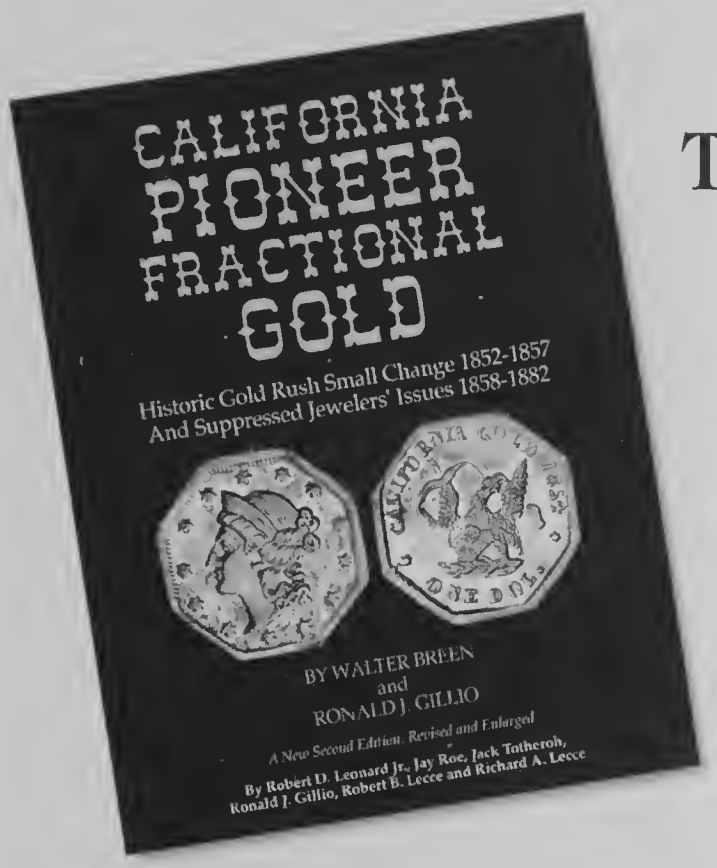

Soon after PCGS introduced its encapsulation service, some dealers believed that CC Dollars were being 'rewarded' with a grade that was as much as a full point higher than coins from other mints in comparable physical condition. Whether this was true or not, for many dealers it was worth the risk of cracking out every GSA CC Dollar that had a 'shot' at a higher grade. And crack them out they did! For its part, NGC gained a reputation as favoring beautifully toned coins. Again, the result was the same. Many beautifully toned GSA CC Dollars are now lost forever to the GSA collector.

But all GSA news is not bad news. GSA CC Dollars have recently gained remarkably in popularity and many dealers have begun to realize that the coins are often worth more in the original holder. As a result, I believe that the pace of GSA crack-outs has definitely subsided.

And there's more good news. At this year's FUN Show, NGC unveiled its new grading service for GSA CC Dollars. The new service seems to be gaining in popularity, but only time will tell if it will ultimately become a marketing success. If nothing else, perhaps it will extend the life of a few more GSA CC Dollars.....at least for a while.

California Pioneer Fractional Gold

is yours when you order The Bowers and Merena™ Beverly Hills Rarities Auction catalog.

1854 octagonal $1 MS-62 PCGS

Important 1853 half dollar State Arms MS-63 PCGS

1853-FD octagonal half dollar rarity MS-61 PCGS

ON SEPTEMBER 14th, IN A SALE THAT WILL APPEAL TO SPECIALISTS AND CONNOISSEURS ALIKE, Bowers™ will auction some of the greatest rarities in American numismatics.

Included in the Beverly Hills auction is the famous Jay Roe Collection of California Fractional Gold, which is widely recognized as the finest and most complete compilation of California Gold Rush coinage ever amassed. Not only is this legendary collection featured in the Rarities Auction catalog, but it is beautifully photographed and described in the long-awaited second edition of the numismatic classic, *California Pioneer Fractional Gold.*

"The Jay Roe collection includes some of the finest coins to become available in years."
Paul Montgomery
President

"I look forward to seeing you in Beverly Hills."
Mark Borckardt
Vice President, Numismatics

GET BOTH BOOK AND AUCTION CATALOG FOR JUST $39.95 (an $80 value!)

When you order Bowers' Beverly Hills Rarities Auction catalog, you also receive the sequel to Breen and Gillio's original masterwork, *California Pioneer Fractional Gold.* Revised and expanded, this newly released 264-page volume solves many of the mysteries that have shrouded this period in American numismatics. The book's "enlarged illustrations and detailed descriptions make it easy to identify and classify all types of varieties of these historically important pieces," explains Ken Bresset of the ANA.

All this is yours when you order your Bowers and Merena Rarities Auction catalog. An $80 value, just $39.95

Your Rarities Auction catalog order also includes Bowers' *CoinDigital*™ interactive CD of the print catalog and the *Crown 100*™ DVD of the top 100 coins to be auctioned. This four-part set is just $39.95 ($80 if purchased separately). To order now call toll free 1-888-540-2646...or mail the coupon below.

Complete this coupon and mail with payment to Bowers and Merena Galleries, 1 Sanctuary Blvd., Suite 201, Mandeville, LA 70471.

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60–Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS63–Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS64–Dislinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65–Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.

MS67–Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

* Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

COUNTERFEIT COIN BULLETIN

An invaluable guide that warns of deceptive counterfeit and altered coins in the numismatic marketplace.

- Learn about dangerous fakes.
- Avoid costly mistakes.
- Ensure the integrity of your personal collection, museum cabinet or dealer inventory.

Loose-leaf, self-indexing bulletins (5 7/8" x 8 1/4") issued 3 times per year.

Each installment includes a minimum of 8 reports, plus an informative feature.

$60 per year

for ANA members; $100 for non-members. Non-U.S. members & subscribers please add $15.

a publication of the American Numismatic Association (ANA) and the International Association of Professional Numismatists (IAPN)

User-friendly, numismatic information delivered right to your door.
Subscription includes a handy, three-ring binder in which to organize your bulletins.

The 1913 Liberty Head Nickel
Our Most Famous Coin

by Ed Lee

They might as well make a movie about these most famous American rare coins. One specimen, I recall, broke the $100,000 barrier and that was 30 years ago. The Eliasberg example blasted through the $1 million barrier. A Hawaii Five-0 episode featured one. Two were owned by a king. A reward of $1 million was offered in May for the "missing" Reynold's specimen, which led to its re-discovery after an amazing amount of publicity crossed the U.S. as quickly as a Concorde. They stole the show at the recent 103rd ANA Convention in Baltimore where all **five coins** were exhibited for the first time in 83 years. And a very expensive and exclusive party was given for them the night before the July 30th thru August 3rd ANA. The sale of the Eliasberg specimen for about $3 million, was announced at this "Nickel Party", creating more coast-to-coast publicity that is still ongoing. Two numismatic writers are starting to call 2003, "The Year of the Nickels."

As the new owner of the Eliasberg PCGS Proof 66 1913 Liberty Nickel, I have been asked to write an article for *the Coin Dealer Newsletter* on this most famous of American rare coin. As the owner/guardian/custodian of this numismatic treasure, I would prefer that someone else describe its position in our numismatic history in order to avoid "gilding the lily." Q. David Bowers, probably our most prolific numismatic writer, had this to say about the Eliasberg/Lee specimen in an article published in the August 7th edition of *The Telegraph* newspaper, Nashua, NH. "It's the creme de la crème, the rarest of the rare" and, "the finest known specimen of a great American rarity." In an auction catalog Dave described it as follows: "This piece has a glittering mirror surface and, perhaps, is the only specimen with this characteristic (the others exhibiting duller, more matte-like fields)." In 1996 he wrote, "Of all American rarities, the 1913 Liberty Head nickel is probably the most famous."

Besides its now obvious status as what many consider to be the #1 rare U.S. coin, its pedigree is extremely important. It was owned by Louis Eliasberg Sr., for decades. He was the only man to have ever assembled a complete collection of United States coins including dates, denominations and mintmarks. This is an epic/unique task that no one, including Bill Gates or Warren Buffet, could hope to accomplish today. For example, the Child's specimen of the 1804 Silver Dollar is in the strongest of hands, and may be held for the life of its owner, or longer. It might even be handed down to his heirs.

Allow me to quote from the April 27, 1953 issue of Life Magazine which dedicated four pages to Louis Eliasberg Sr., and his collection in a prime issue featuring the newly crowned Queen Elizabeth II of England on its cover.

"Louis Eliasberg, who was born in Selma Alabama has been as successful at making money as collecting it. He started his business career as a runner for a bank and today, at 57, he is the millionaire president of a Baltimore commercial banking house, the Finance Company of America, which he organized in 1919. {Note: This was the year that the first ads appeared seeking to buy any or all 1913 Liberty nickels.} He began collecting coins as a hobby in 1925, and as his business fortunes prospered he spent more and more time tracking down the choicest specimens."

"For years he has attended auctions throughout the country and on one occasion spent $100,000 on a collection. In 1950 two rare coins that would complete his own U.S. collection were at last put up for sale. [His 1913 Liberty nickel was acquired in 1948 from Abe Kosoff in a deal that included Eric Newman.] One was secretly bought for him by Morton Stack a Manhattan coin dealer. Eliasberg himself bought the other and finally became the undisputed king of 25,000 numismatists in the U.S."

"He gave an affectionate response to questions about the worth of his coins. 'It's like your wife and children' he said. 'They're priceless. You don't set a value on them.' "

I can't help but compare our Louis Eliasberg, the "king of coin collectors," to another former owner of two of our treasured 1913 Liberty Nickels, King Farouk of Egypt. Eliasberg was a mild mannered, self-made scholarly man who wore glasses and smoked a pipe. In contrast, Farouk inherited his throne and plundered his country's treasury to buy anything he fancied. This included a large coin collection that twice contained a 1913 Liberty Nickel and the 1933 Saint-Gaudens $20 Gold piece (sold last summer for $7.59 mil.), a collection of pornography, and much more. This was a man who engaged in sordid practices that would have left our Elisasberg speechless had he heard of them. Eventually, his excesses caught up to him and he was overthrown by the military led by an Egyptian officer, Colonel Nasser. Farouk was exiled and died of his excesses relatively young.

I have owned coins even rarer than this Eliasberg specimen, including a unique world-class numismatic treasure once owned by Farouk, but I wouldn't exactly brag about this pedigree. Oh well, I am considered somewhat eccentric and I suppose owning a coin that once belonged to a king is truly special. Yet, in my heart of hearts I always admire a decent self-made family man like Eliasberg, far more so than any king or queen for that matter.

Since so few numismatists attended the "Nickel Party," I should describe it for your interest. Dwight Manley and I were driven to the party by a mutual friend in his armored car, which in itself was interesting. We arrived at a modern glass building and we went up to the offices of Diamond International which publishes comic books, and which generously sponsored the party and provided the high security case which enclosed about $11 million in 1913 Liberty Nickels at the ANA and at the party.

The walls were lined with unique cartoon and super-hero art worth a lot of money. I was immediately attracted to the comic character, Scrooge McDuck, Donald's uncle. He was my childhood favorite, as he liked to swim in his pool filled with Gold and Silver coins...Nickels would have been beneath him.

CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

Security was tight with BIG guys with BIG guns and two police cruisers stationed outside. I wonder what they must have thought about being bodyguards for the Nickels? It must have seemed strange to them. Even I felt it was a bit surreal being surrounded by comic book art and seeing for the first time a plate block of the world-famous "upside down" airmail stamps. I believe there are only seven of them known, so very rare, although not quite in the same league as our Nickels.

The food and drink were exceptional and the speeches went on and on. Dave Bowers volunteered to make the announcement that the Elisaberg/Manley specimen of the 1913 Nickel was about to become the Eliasberg/Lee specimen. Dave graciously kept his announcement of my acquisition as short as he could make it. Then I handed Dwight the check and was dazzled by all the flashes. Dwight was offered a profit that night over and above the selling price, but he rejected it, as you would expect, as a deal is a deal.

The next day we learned that more numismatic history was being made that same night when some top graders examined the "missing for 41 years" 1913 Liberty Nickel, declaring it to be authentic. I asked John Albanese about this and he said, "it was fairly easy to authenticate as all were struck from the same die and the ones that still have Proof surfaces have a very similar look to them."

The buzz at the show was that the newly recovered specimen would most likely grade a Proof 61 or 62, making it the third finest of the three certified coins, assuming that it gets slabbed. There was a rumor circulating that a dealer was willing to pay about $2 million for it. Even the least of the five 1913 Liberty Head Nickels is worth $1.4 million or more today.

Famed dealer, B. Max Mehl, spent millions on advertising his catalog and all copies offered to buy any of the 1913 Liberty Nickels. He is credited with making the 1913 Liberty Nickel the most famous coin in the world and with messing up various transit services as conductors searched their change for one. But even that may pale in comparison to the national publicity generated this year by the Nickels. Besides countless newspapers and TV stations that featured the story on the missing 1913 Nickel and the $1 million reward, it also went out on America On Line (AOL). Their Gordon Anderson wrote about the "missing for 41 years 1913 Nickel" and related "Nickel News," including the Eliasberg specimen.

Gordon Anderson has written two more stories about the Nickels and the 1804 Silver Dollar, and both mentioned me, thank you very much. I contacted him after noticing an error in his original Nickel story. Surprisingly, he responded and made the corrections. He told me that stories about coins were very popular so I said, "you must come to the ANA", which he did. In his latest stories, he quoted Dwight as saying, "He might have undervalued the Eliasberg Nickel," but neither of us could have foreseen all the PR the coins were about to get. I have been told that AOL alone reaches something like 30 million households, so the publicity generated this year is unprecedented although B. Max Mehl kept at it for decades. Between Mehl and the 2003 publicity, no coin in history will have received such coverage.

The heirs of George Walton, who was killed in a car accident, were told four decades back by a large New York City dealer that their Nickel was bogus. Actually it was two votes that it was a fake and one that it was real. Is this an early instance of consensus grading that went awry? Actually, this error made the family rich as it was worth only a few thousand then vs. about $2 million today. What an investment! I am very happy for them.

I am collecting 1913 Liberty Nickel memorabilia and was able to buy, at the ANA, a plaster cast taken from the second best 1913 Liberty Nickel graded PR64 by PCGS. A kind collector gave me a copy of the 1953 Life Magazine signed by Louis Eliasberg. Then the relevant auction catalogs and... I think I'm getting carried away as usual, but collectors and collector/dealers are like that. Right?

The mass media ask, "Why did you buy this coin?" The quick answer is that it is the **most famous** and **undervalued** rarity in numismatics. (The Child's specimen of the 1804 Dollar brought $4.19 million in 1999.) In what top area of collecting can one buy the #1 item for only $3 million? Top paintings? Best suit of armor? Finest piece of furniture? Every other #1 top collectible is either unavailable at any price or way too expensive. Coins are still cheap so they have their growth potential still ahead. After more than 40 years of selling quality rare coins as an investment, I feel that the time and tide are finally on our side.

The complete answer is more complex. Our dollar has lost 89% of its purchasing power since 1945 and I don't want to be part of the "Baby Boomer Bummer" generation. After 40 years in the business I can almost hear the "termites" eating away at my retirement dreams. Frankly, I wouldn't mind being the only man in history to retire on a Nickel.

My interest in coins began when I was very young and when I walked to my grandparents' most summer days and grandpa put a Nickel in my hand so that I could buy a bottle of Coke. Who would have ever guessed then that I would make numismatic history with another Nickel in hand? The Hindus believe in a "circle or wheel of life." It seems that I have come full circle in my career although the legendary 1913 Liberty Nickel saga will roll on forever.

Paul Montgomery
Bowers and Merena Galleries
1 Santuary Boulevard
Suite 201
Mandeville, LA 70471

Wow!!! What an auction!

Dear Paul:

Wow!!! What an auction!

This was my first experience at selling a major consignment of coins in an auction, and as I told you after the sale in Baltimore, I am absolutely delighted with the results.

I commend you and your staff on your professionalism in handling my lots as well as all the promotion you afforded the sale prior to the auction. I don't think any previous auction received the coverage that this one had in so many ways. Your efforts certainly paid off, as many record prices were established and both buyers and sellers went away with big smiles on their faces.

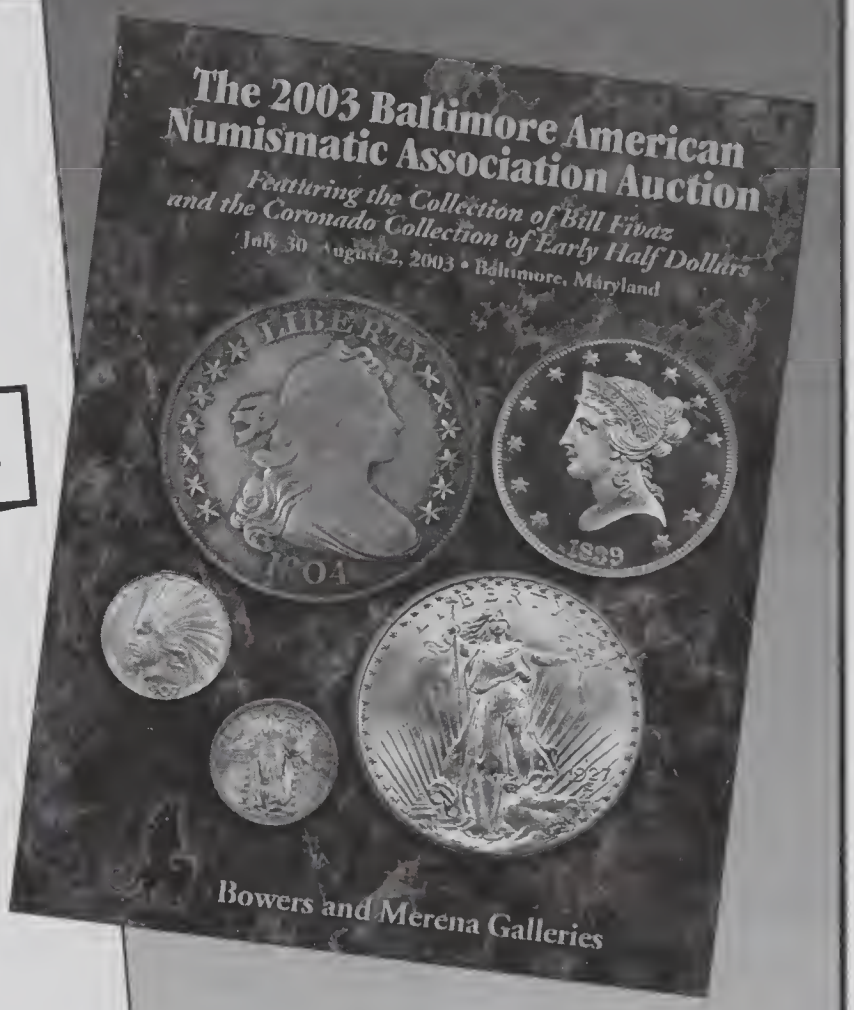

The all color catalog was another great innovation, as was the ability to bid on the internet.

All in all, it was an extremely successful sale, especially considering the myriad of auctions immediately preceding the ANA. This is certainly a testimonial to Bowers and Merena Galleries' commitment to pulling out all the stops to get the maximum exposure for its customers, and I thank you again for this and the way I was treated throughout the process.

Finally, it was a pleasure to meet you and I look forward to future business with you and your fine firm.

Kindest personal regards,

Bill Fivaz

Consign to Bowers and Merena's Baltimore Coin and Currency Convention Auction

Consignment deadline: October 6, 2003

Auction dates: December 4-6, 2003

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem full bands" rolls are worth more than listed prices– particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are in the CDN

IF YOU HAVE COINS TO SELL...

WHETHER IT'S A $4,000,000 1804 DOLLAR OR A MODERN ISSUE PROOF SET...

The only strategy that makes sense...is to call the King Of Cash before you actually sell your coins!

Nobody spends more money buying U.S. coins from collectors and investors like you than **Spectrum** Numismatics! And the nice thing about **Spectrum** is we desperately need to buy all of your coins. That's why our name is **Spectrum**... we buy it all!

***MODERN COIN DIVISION**

With the acquisition of Lee Cook, world-renowned Modern Coin expert, **Spectrum** urgently needs to buy all the Modern Coins it can accumulate! While **Spectrum** has always bought Modern Coins in limited quantities, we now need to spend millions of dollars on Modern Eagles, Proof Sets, Mint Sets, BU Rolls, and all your Modern Issues!

***MARKET KNOWLEDGE**

When you deal with **Spectrum**, you deal with numismatic professionals. We have the knowledge that covers the **Spectrum**, whether it's a collection of early United States rarities, a hoard of pre-1950 20th Century coins, Patterns, Modern Issues, or a large and diverse holding in all areas of the market. We are interested in buying. Period.

***IMMEDIATE FUNDS**

There is no waiting! You don't have to wait until we sell your coins. You don't have to wait while we call in an outside expert to evaluate your coins. Why? Because **Spectrum** has the customers, we have the money, we have the experts, and we have the experience. Nobody pays more...nobody pays faster...nobody makes it easier for you to sell your coins.

***GENEROUS FINDER'S FEES**

If you find a coin deal that's too large, too complicated, or one you don't want to get involved in for any legitimate reason, you don't have to leave the money on the table. Call **Spectrum**!

***HOW TO CASH IN!**

If you want to sell your coins - any and all coins - for absolute top dollar, pick up the phone and call today to get your piece of the action and your share of the cash! Call collect and tell them you want to talk to the King of Cash.

REGISTRY SETS GET THE COIN MARKET'S HIGHEST GRADES

by Scott A. Travers

The concept of registry sets gets my highest grade. On behalf of my firm, I have been involved in the formation of some of the most important registry sets ever assembled: I have brokered the sale of many millions of dollars worth of coins for these assemblages and hand-picked virtually all of the coins for some of the Number One sets.

It concerns me, therefore, when misunderstandings arise as to how coin registry works, or when misguided enthusiasm leads to perversion of the system. I'd like to address both of these concerns.

The Professional Coin Grading Service introduced its Set Registry™ program in booklet format in 1997 and on the Internet in 2001, and the Numismatic Guaranty Corporation of America later launched a parallel program, the NGC Registry.

PCGS's basic concept is simple: Collectors who own coins certified by that service organize those coins into sets and "register" the sets by entering the serial numbers of the coins over the Internet on the PCGS Web site. PCGS, through its software, assigns ratings to these sets reflecting the rarity of the coins and the grades in which they were certified, plus or minus points for special characteristics or the absence of such characteristics. Thus, certain coins may receive bonus points for having Deep Cameo surfaces, while others may have points deducted from their score because they lack special features, such as Full Heads in the case of Standing Liberty Quarters. An overall rating is determined by dividing the weighted grade sum by the total sum of the weights for the entire set. The sets are listed sequentially on the Web site, from the highest rating down. The top-rated sets in various categories are singled out for special recognition. The NGC Registry follows a similar procedure, but sets registered there may contain coins certified by either NGC or PCGS.

In a sense, PCGS grades registry sets. In doing so, it "weights" them by taking into account three key elements: 1) the overall rarity of each coin (in other words, whether it is rare in every grade, 2) the rarity of each coin in the highest two or three grade levels and 3) the price of each coin. Price is considered important because it indicates the degree of demand for the coin. In determining these weights, the company uses a spreadsheet drafted in advance by David Hall, the company's founder, and tailored to each series. The spreadsheet is subject to modification based on feedback from registrants. The company admits it is "not 100% scientific," but claims it is a reasonably accurate reflection of the relative rarity and importance of the coins. The weights assigned to individual coins are added to arrive at a total weight.

Participation in the Set Registry™ is free, and registrants are eligible for a number of benefits, including free grading of up to five **non**-PCGS-certified coins once a set reaches 90 percent of completion. For many, the single greatest incentive for taking part is the prospect of being recognized in a very public way as the owner of an exceptional collection. Not everyone chooses to be identified by name; many use code names for their collections – names such as "High Desert" or "The Cardinal Collection." And some choose not to be identified at all by not even registering their coins (as is their prerogative) until and unless their collection achieves a top rating. But all strive to have their collections recognized as the best and derive tremendous satisfaction if and when they are. It validates the time and money they have invested and gives them a sense of fulfillment and pride – very much like what they might feel if they were selected for a major award in their profession or community.

There are tangible benefits for PCGS as well. By its very nature, the program promotes submission of coins to the company. More than that, it establishes and nurtures a bond between the company and collectors – far closer and more lasting than what would exist if registrants viewed the company as simply a supplier of useful services. And just as Set Registry™ listings provide recognition for people with the best collections, there is a reciprocal plus for the company: Those premier collections serve as impressive showcases for PCGS certification.

Beyond the direct participants, there are ripple effects that have a positive impact on the market as a whole. As registrants compete for the finest available specimens of coins in the sets they are collecting, there is heightened upward pressure on the prices of those coins. Having brokered hundreds of transactions involving coins bound for registry sets, I can attest to the strength of the demand for premium-quality coins that results from this spirited – sometimes even cutthroat – competition.

For the most part, this is healthy competition, and the high prices paid for "pop-top" coins – those with the highest grades in the population and census reports – are justified by the rarity of the coins, or at least the condition rarity. But in one important area, we all need to be concerned by such prices. Many Modern Proof coins, including Lincoln Cents and Statehood Quarters, aren't truly rare, even in extremely high grades, and therefore do not have fair market values in line with the stratospheric prices registry set owners sometimes pay for them.

Buying decisions are influenced heavily by the population and census reports. When these reports show that a certain coin has been certified as Proof-68 Deep Cameo, for example, and no specimen of that coin has ever been certified higher, registry set owners feel an understandable impulse to buy that coin because it will enhance the rating of their collection and its chance of being listed on the PCGS or NGC Web site. This can lead to a Bidding war – and overzealous collectors can end up becoming casualties in this kind of war if the coin in question is a "pop-top" Modern coin. That's because the

CIRCULATION & ADVERTISING Betty Morris

The **CDN MONTHLY SUPPLEMENT** is a supplement to the weekly **COIN DEALER Newsletter** (*Greysheet*) both report the national Dealer to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified) but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The **CDN** may not change Bid just because a dealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly **CERTIFIED COIN DEALER Newsletter**, *Bluesheet*, provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

population report might be misleading: It may be that few coins have been certified in very high grades simply because few coins were submitted in the past. Today, Modern coins are being submitted in far higher numbers, and given the coins' high mintages, well up in the millions, other Proof-68 – or even Proof-69 or Proof-70 specimens – have later appeared in pop reports, sometimes in quantity.

Earlier this year, one "Modern rarity" – a 1963 Lincoln Cent in a PCGS Proof-70 Deep Cameo holder – changed hands for $39,100 at Heritage's FUN Show auction. The coin was touted as the only Proof Lincoln Cent of that date ever to receive a perfect grade from either PCGS or NGC. However, the coin apparently started to exhibit some light toning after PCGS assigned that lofty grade. Price appeared to be no object to the buyer; he simply wanted the coin, and was willing – and able – to pay whatever it took. There were also special circumstances involving a youngster's coin collection that I cannot elaborate on here. Clearly, however, $39,100 was not a fair market price for this coin. A fair market price is the amount that a willing buyer pays to a willing seller when neither is under any particular compulsion or compunction to complete the transaction – and for whatever reason, two buyers in this case appear to have been under pressure to purchase the coin with little disregard for the price.

Time will tell whether more traditional collectible coins in very high grades are worth the higher price levels to which Set Registry™ competition has driven them. Unlike high-grade Modern coins, however, these older coins have proven track records. Their mintages were generally much lower; they were set aside in far more limited numbers; and collectors can have reasonable confidence that the pop report figures accurately reflect their rarity in top condition. Over the years, such coins have performed very well, and we can expect that trend to continue. For that reason, I applaud the role of the Set Registry™ in stimulating new interest in this kind of material.

Sometimes new ideas burst upon the scene, shine brightly but briefly, then fade from view as quickly as they came. So it was with 3-D movies, hula hoops, Nehru jackets, pet rocks and miniskirts. All had their day, but all were "for a day" – in short, they were fads. Far from fading away, the registry set programs appear to be picking up momentum as time goes by.

The degree of new interest in the program is remarkable. In just the last year, the number of sets in the PCGS Set Registry™ has doubled, from 4,000 to nearly 8,000. And the quality has remained extremely high, according to company officials. After assigning ratings to each set, PCGS arranges to have three of its leading experts – John Dannreuther, Bruce Amspacher and David Hall – examine the best sets and select the top five in each category. These are then recognized on the Web site. Categories include the ten best classic sets (1792 to 1964), the five best modern sets (1950 to date) and the five best registry set newcomers.

Recently, PCGS established a Canadian Set Registry™ – and this, too, is drawing considerable interest. It was launched with 35 sets from the Belzberg Collection which Heritage auctioned, and eight months later it had grown to 254 sets.

As I watch the progress of the registry set programs, I am becoming increasingly convinced that they will be with us for many more years to come. Set registration has moved beyond the point where it can be dismissed as just a fad; it has taken firm root with a growing segment of the hobby – including some of the most important collectors in the world – and I see it continuing to occupy a very prominent niche in the decades ahead.

I liken set registration to the Whitman folders of an earlier time. Introduced in 1940 as a refinement of the Depression-era "penny boards," the now-familiar blue folders revolutionized the way Americans collected coins in the mid-20th century and played a major role in the hobby's rapid expansion during that era. By the 1960s, Whitman folders seemed to be everywhere – and though their sales and usage have declined in recent years, they remain a significant tool for newer collectors, especially youngsters.

The grading services themselves are, of course, examples of new ideas that proved to have lasting value and therefore have endured, standing the test of time by continuing to fill the marketplace need that brought them into being in the first place. Certified grading and "slabs" were novel concepts 17 years ago, when PCGS introduced them, but today they are integral – and universally accepted – elements of our vibrant 21st-century coin market.

Over the years, NGC and PCGS have updated, refined and sought to improve the services they offer to collectors, and registry sets are perhaps their most successful innovation since certification itself.

On balance, set registration is good for collectors, good for the grading services and good for the hobby. Collectors should be careful not to pursue their registry sets with what Alan Greenspan described as "irrational exuberance" – but with a healthy approach, this can be an enjoyable diversion with phenomenal potential for profit over time.

Best of all, from the standpoint of the hobby in general, this may be the answer to a question many of us have been asking: Where will great collections come from in the future?

BU ROLLS

[illegible] of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. [illegible] some of the rolls in the late 60's tend to be dark; these bring lower prices. "gem full steps" rolls (when available) bring higher prices. In the Mercury series, "gem full [illegible]" [illegible] particularly the pre-1941 [illegible] Washington rolls [illegible] "put together" bring lower prices. Gem full strike Walking Liberty rolls [illegible] particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

U.S. Trade Dollars: An Under-Appreciated Series

by Steven C. Liu

Introduction

Trade Dollars are one of the ultimate collectible series. It is reasonably short and available in most grades at the Choice MS level and lower. It was produced in both Proof and circulation-strike format. The series even contains two classic rarities. With this series, you can also find its share of varieties: including an over mintmark variety; two major Doubled Die varieties; two obverse and reverse die Types; and, many other lesser die variations. The U.S. Mint also produced a six-piece pattern set, numerous die trials and various other patterns that can be collected along with the regular Trade Dollars. Finally, collectors can chase after the increasingly popular chop marked specimens.

A Brief History

At the beginning of this nation's history, value given to any nation's money was determined by the amount of precious metal contained in each coin. When our merchants did business with foreign merchants, we would pay them in coin. The coins were worth as much as the Gold or Silver they contained. As the coins entered China, the merchants would have the coins assayed. Each coin that was deemed acceptable would then be "chopped" so that the merchant's seal would be punched onto the coin. As a coin got passed around, it would accumulate more of these so-called chops.

Before the Trade Dollars, all of our larger Silver coinage was used as "trade" coinage. In fact, I have seen an 1855-S Liberty Seated *Half* Dollar with Oriental chop marks. As the 1870's approached, American merchants were complaining that they were losing business to foreign competitors. Our merchants said that the Chinese, in particular, preferred the larger Mexican 8 reales coin. Consequently, the Chinese merchants applied a surcharge when accepting our coinage. On February 12, 1873, President Grant signed into law the Mint Act that created, among others, an official Trade Dollar of 420 grains at 90% fineness of Silver content.

Unfortunately for the Trade Dollar, the value of its Silver metal content dropped from $1.05 in July 1873, to 85¢ in August 1876. Since these coins still had a face value of One Dollar, Silver merchants were able to sell their Silver bullion at an easy profit for domestic use. On July 22, 1876, Congress reacted to this swindle by abrogating the legal tender clause. In China, matters were also not going so well for the Trade Dollar. These coins were seeing increased acceptance in the South, but remained unpopular in the northern parts of that country.

Domestic problems with this coin continued. In 1877, factory owners bought the coins at a discount and then paid their workers with them at face value. These workers were then forced to use them at a discount at their local stores, and then these merchants had to trade them in at yet another discount to their local banks. It seemed that no one really wanted them, and were willing to accept them only at a steep discount. Finally, Treasury Secretary Sherman ordered a halt in regular coinage on February 22, 1878, although a quantity was minted at the Carson City and San Francisco facilities before the order was received. In 1965, the Trade Dollar reclaimed its legal tender status with the Coinage Act of July 23.

Date-By-Date Analysis

1873 Circulation-Strike (MS): This date is underrated in all grades, but reasonably available up to the gem level. Most specimens are well struck and with a satiny luster. Most specimens were shipped to China and melted. The finest known specimen is graded MS67, and is the ex Honorable Jimmy Hayes.

1873 MS chopped: This date is extremely rare in all grades.

1873 Proof: This date is scarce and underrated. Some even claim that this date may be the toughest after the 1885 and 1884. Rare in Gem condition, it is rarely found with deep mirrors or flashy eye appeal.

1873-CC: This date is scarce in all grades and rare in Uncirculated condition. In fact, it is extremely rare in MS63 and better, and specimens with good Mint luster are rare. The finest known specimen is the ex Cornelius Vermuele, and graded MS65.

1873-CC chopped: This date is very scarce in all grades.

1873-S: This date is scarce in all grades, and even more so in Uncirculated condition. However, this date is available in Gem condition. There is an estimated 4 to 8 specimens in MS65, with none finer.

1874 MS: This date is very underrated in all grades, but becomes relatively available in gem condition. This date is tough to find well struck and with good luster. Most of them were shipped to China and melted. The finest known specimen is graded MS67.

1874 MS chopped: This date is rare in all grades.

1874 Proof: This date is scarce and underrated. After the 1884 and 1885 dates, this vies with the 1873 as the top two keys of the Proof series. Rare in Gem condition, this date also seldom comes with deep mirrors or flashy eye appeal.

1874-CC: This date is available in all grades, but becomes rare in Gem condition. This date usually comes with weak luster and some weakness of strike. The finest known specimen is graded MS66 and is an ex Amon Carter.

1874-CC chopped: This date is very common in all grades.

1874-S: This date is available in all grades, but becomes rare in Gem condition. This date usually comes with some weakness of strike. There is an estimated 3 or 4 specimens at the MS65 level, with none finer.

1874-S chopped: This date is very common in all grades.

1875 MS: This date is underrated in all grades, but is reasonably available in Gem condition. This date usually comes well struck and with nice luster. The vast majority of this date comes with the Type 2 reverse (without the berry in the claw and with the berries round). The Type 1 reverse (berry in claw, and elongated berries) specimens are rare. The finest known specimen, graded MS68, is from the Fairfield Collection and is also ex Marc Emory.

1875 MS chopped: This date is extremely rare in all grades.

1875 Proof: This date is scarce and underrated. It is also the first Proof year of the series that is reasonably available with cameo contrast. Type 1 reverse specimens are rare.

1875-CC: The most common CC Trade Dollar, but rare above MS63. It usually comes well struck. Most of the specimens have the Type 1 reverse, and the Type 2 reverse specimens are rare. Apparently, the Type 2 reverse dies arrived at the Carson City Mint late in the year. The finest known specimen is graded MS66, and is an ex Amon Carter.

1875-CC chopped: This date is very common in all grades.

1875-S: Probably the most commonly available Trade Dollar, this date is available in all grades. The quality of strike is mixed. Most of the

CIRCULATION & ADVERTISING Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly **COIN DEALER Newsletter** (*Greysheet*), both reporting the national Dealer to Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current trading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market, such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The **CDN** may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly **CERTIFIED COIN DEALER Newsletter** (*Bluesheet*) provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

the* COIN DEALER *Newsletter

specimens have a Type 1 reverse, but specimens with the Type 2 reverse are frequently encountered. This date also comes with a popular over mintmark variety. Though considered at least scarce, the rarity of this variety is speculative because this was unknown to the numismatic community until the early 1960's. Probably many 1875-S specimens are un-attributed as over mintmarks. The finest known specimen is graded MS68, and is an ex Amon Carter. For the over mintmark variety, there are currently three MS65 specimens graded (none finer), with the Silverman specimen being the only one known using that reverse die.

1875-S chopped: This date is very common in all grades.

1876 MS: This date is underrated in all grades. It is also reasonably available at the Gem level. The quality of strike is mixed. This year comes with two obverse Types, with Type 2 having five fingers in the extended hand holding the olive branch and ribbon ends pointing downwards. (Type 1 has only four fingers in the extended hand, and with the ribbon ends pointing to the left.) About two-thirds of all extant specimens are of the Type 1 obverse / Type 1 reverse (T1/T1) variety, and the T1/T2 variety comprises about one-third of all extant specimens. The T2/T2 specimen is believed to be very rare, and comprises a very small percentage of the total extant population. There is an estimated ten specimens graded at the MS66 level, with none finer.

1876 MS chopped: This date is extremely scarce in all grades.

1876 Proof: This date is scarce and underrated. Flashy and eye appealing specimens are rare. It is also rare in Gem condition. About 80% of extant specimens are of the T1/T2 variety, with the T2/T2 variety being about 20%. The T1/T1 variety is very rare, and comprises a very small percentage of the total extant population.

1876-CC: This date is somewhat scarce in all grades, and rare in Uncirculated condition. In fact, it is very rare in MS63 and better condition. The quality of strike is usually high, and occasionally even prooflike. This date comes as T1/T1 or T1/T2, with the latter probably the scarcer of the two. However, the T1/T1 variety also comes with a popular reverse Doubled Die variety. (The T1/T1 variety without the die doubling is very rare.) This die doubling is very pronounced, and can be easily seen with the naked eye by looking at the branches and berries. As a whole, the Doubled Die variety is somewhat scarcer than the perfect die variety. The finest known specimen is graded MS65 and is an ex Eliasberg. The DDR variety is very rare in Uncirculated grades, with only one low-grade specimen known: the Litrenta Collection specimen.

1876-CC chopped: This date is very scarce in all grades.

1876-S: This date is very common in all grades. The quality of strike is mixed. The T1/T1 variety is the most commonly found, making up over 50% of extant specimens. The balance is approximately a 2:1 ratio between the T1/T2 and T2/T2 varieties, with the T2/T2 considered to be scarce. The T2/T2 variety also has a very rare DDO variety, with the doubling evident on Liberty's hand, branch and foot. The finest known specimen is graded MS66 and is an ex Eliasberg.

1876-S chopped: This date is extremely common in all grades.

1877 MS: This date is somewhat underrated in all grades, but is very rare in Gem condition. In order to save on die wear, the Mint spaced the dies far apart. Consequently, the vast majority of the specimens are weakly struck at least in the stars. The finest known specimen is graded MS66.

1877 chopped: This date is extremely scarce in all grades.

1877 Proof: This date is scarce and underrated. It also seldom comes with deep mirrors and good eye appeal.

1877-CC: This date is scarce in all grades, and rare in Uncirculated condition. It is usually well struck. It is very rare in MS63 and better. The finest known specimen is graded MS66.

1877-CC chopped: This date is very scarce in all grades.

1877-S: This date is very common in all grades, and comes well struck and occasionally prooflike. The finest specimen is graded MS67.

1877-S chopped: This date is very common in all grades.

1878 Proof: A Proof only date, it is somewhat scarce and underrated. It seldom comes with deep mirrors or good eye appeal, and is rare in Gem condition.

1878-CC: Scarce in Circulated grades and rare in Uncirculated condition, this date is very rare in MS63 and up. The pop reports show extensive resubmissions at the MS63 and MS64 level. This date is usually well struck and with a satiny luster. The finest specimen is graded MS66.

1878-CC chopped: This date is very rare in all grades, and is the **rarest** chop marked Trade Dollar.

1878-S: This date is very common, and is the most available date in MS66 and higher due to a small hoard of two dozen coins found in Seattle in 1989. This date is usually found well struck. The finest specimen is graded MS68 and is from the Knoxville Collection.

1878-S chopped: This date is somewhat scarce in all grades.

1879–83 Proof: These dates are reasonably available in all grades and with cameo contrast. They are also commonly found weakly struck.

1884 Proof: Only 10 coins exist, and struck from authorized dies in a normal production manner. Most extant specimens were mishandled, with Gem specimens rare.

1885 Proof: One of the rarest Silver Dollar-sized U.S. coins, there are only 5 specimens. They are presumed illicitly struck. All specimens have some weakness of strike in the stars. Most were mishandled, with Gem specimens rare.

Top Six Dates By Condition

MS60+: 1878-CC (rarest), 1876-CC, 1873-CC, 1877-CC, 1875, 1873-S.

MS63+: 1876-CC (rarest), 1873-CC, 1878-CC, 1877-CC, 1873-S, 1874-CC.

Proof: 1885 (rarest), 1884, 1873, 1874, 1876, 1875.

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. **Must** have eye-appeal.

MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

* Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

CONSIGNMENTS BEING ACCEPTED

Three Spectacular Venues to Sell Your Coins!

■ SANTA CLARA, CALIFORNIA — NOVEMBER 21-22, 2003

CONSIGNMENT DEADLINE: October 17, 2003

NOW CLOSED!

Superior is proud to be the **Official Auctioneer** of the SANTA CLARA COIN, STAMP & COLLECTIBLE Expo

As the **official auct** **the November 2003 Santa Clara Coin, Stamp & Collectibles Expo** we are pr **The Nevada Collection** among the coins already consigned to the sale. On the heels of our spectacular September Pre-Long Beach Auction — **where Superior realized more than $6 million** — the timing and location of November Santa Clara could not be better. But time is very short — you must act now to have your coins included.

■ ORLANDO, FLORIDA — JANUARY 5-6, 2004

CONSIGNMENT DEADLINE: November 24, 2003

Superior will be conducting an **exclusive Elite Coin Auction just prior to the opening of the FUN show**. It promises to be a power packed sale — **limited to just 1,000 lots** — to kick off the new year and continue the coin market's sizzling run of high flying prices. Because of Superior's success in last January's Pre-FUN auction we already have many consignments for this auction, and space is quickly filling up. It's not too late to get in, but you must act quickly. Consignment Deadline: November 24, 2003.

■ BEVERLY HILLS, CALIFORNIA — JANUARY 25-27, 2004

CONSIGNMENT DEADLINE: December 5, 2003

Superior's Pre-Long Beach auctions are some of the top-grossing sales of the year and the auction promises to be a block buster! We already have millions of dollars worth of U.S. coins consigned and we are very excited about our World and Ancient coin offerings. Included is a seven-figure collection of **Russian Classic Coins** — the largest offering of Gem quality Russian classic rarities in a decade—from Peter The Great to Nicholas II. Also featured is **The Dry Tortuga Collection**, a collection of shipwreck treasures from the waters of the Caribbean. Consignment Deadline: December 5, 2003.

You choose the venue, we'll get you the prices your coins deserve!

FOX VALLEY COINS, INC.

OF AURORA & NAPERVILLE, ILLINOIS

NEEDS YOUR COINS NOW!

Fox Valley Coins, Inc. is the parent company of Fox Valley Coin Auctions and has coins stores in both Aurora and Naperville, IL. The growth of our retail stores and success of our monthly coin, currency and antique auctions, has really created a huge demand for fresh new material. We get buyers on a regular basis from all over the country and we are always looking for collections, hoards, dealer stocks as well as individual specimens. Because we cater to both the advanced numismatist *and* the beginner collector we'll pay high prices for your entire collection and most all dealer inventory.

If you would rather sell your treasures at one of our upcoming auctions, we'll be glad to accommodate you as well. Remember: We're not only interested in the unique rarities but everything!

WE'LL PURCHASE OUT-RIGHT

NICKELS
ENTICING BABY BOOMERS

by Silvano DiGenova

SHIELD NICKELS

The Shield Nickel was first struck in 1866 and ended less than twenty years later in 1883. The Liberty Nickel that followed was first struck in 1883 and ended in 1913. These two series have more in common than just the metal of composition. In particular, both series are **grossly** undervalued in today's marketplace and this article will present the information that illustrates this fact.

It is actually quite surprising that these two series should be so often overlooked by dealers and collectors. Especially when so many in the coin collecting arena discuss numismatic acquisitions from the standpoint of value.

Both series include numismatic rarities, colorful stories relating to "goings on" within the confines of the U.S. Mint, and with the exception of the famous 1913 Liberty Nickel, both series can be completed on a reasonable budget and in a reasonable time frame. As for value, both series provide a wealth of value.

The Shield Nickel was first produced in 1866 in a composition of 75 percent Nickel and 25 percent Copper. The original design included Rays in between the Stars of the reverse. The hardness of Nickel and the shattering of dies may have prompted the design change, but in any event the Rays on the reverse were removed sometime during the production of coinage in 1867 resulting in two varieties of Shield Nickel for that year. No other prominent design changes were invoked during this coins production run which lasted into 1883.

The production of 1867 coins with Rays on the reverse boasts the first semi-rarity of the series. In Mint State 65 this coin is about five times more difficult to locate than the 1866 but is priced at just a modest premium. This illustrates a key point about undervalued series. Specifically, the so-called "better" date coins of the series are often offered at modest premiums compared to the already low levels of the so-called Type coin.

MS65 SHIELD NICKELS

Date	PCGS Pop	CDN Bid	Market Cap
1880	3	$20,000	$60,000
1883/2	4	$2,760	$11,040
1875	17	$1,330	$22,610
1870	20	$920	$18,400
1873 Open 3	21	$925	$19,425
1879	21	$1,200	$25,200
1871	22	$1,080	$23,760
1872	22	$700	$15,400
1874	22	$875	$19,250
1876	24	$740	$17,760
1867 Rays	25	$2,800	$70,000
1881	31	$980	$30,380
1869	44	$570	$25,080
1867 No Rays	49	$640	$31,360
1868	60	$615	$36,900
1866 Rays	105	$1,900	$199,500
1882	133	$460	$61,180
1883	173	$450	$77,850

From 1868 to 1883, the series meanders in regard to production figures. In 1868 production topped 28 million. In 1882 production exceeded 11 million. Business strike production was halted altogether in 1877 and 1878 and production was under 100,000 coins in 1879, 1880, and 1881, reaching its low point in 1880 when the mintage was a scant 19,955. In between mintage figures range from 500,000 to 5 million give or take.

Rarity profiles are pretty much in agreement with original production figures, but that the rarities of the series greatly lag those of other series where the absolute dollars to population comparison is quite clear.

The 1880 Shield Nickel is literally one of the most elusive U.S. coins to acquire in Mint State in the entire catalog of U.S. coins. Vast experience and the guidance of the various population reports suggests less than 20 surviving Mint State specimens in all grades. PCGS has graded 3 specimens of the 1880 as MS-65 (with one higher!) and the coin is priced in the *CDN Monthly Supplement* at $20,000. Compare this with a 1901-S Barber Quarter with a population of 6 in MS-65, a few coins graded even higher, and a *CDN Monthly Supplement* Bid of $39,500.

We find all the dates from the 1870s attractive in MS-65 at today's price levels. See, for example, the number of coins theoretically available to dealers for under $1,000 like the 1870, 1872, 1874 and 1876. Another way to look at it is to note that the entire population of PCGS MS-65 Nickels can theoretically be accumulated for $765,095! This total is arrived at by multiplying the current population with the CDN Bid for the coin. Compare this say with the Buffalo Nickel series where the capitalized valuation of two key dates alone is well over a million dollars!

All of which leads to a conclusion that completing a set of Shield Nickels (with or without the 1880 depending upon a collectors means) is numismatically worthwhile and we believe it's a long term profitable venture for both the selling dealer providing the coins and the collector accumulating them. Such a set should emphasize coins graded MS-65 and perhaps MS-66. MS-67 coins, however, should only be acquired when the price for a slightly better date is available at a modest premium to the Type coin.

LIBERTY NICKELS

Let's take a look now at the Liberty Nickel Series. One of the great things about getting collectors involved in putting together a series by date is that it becomes "fun," a word not used nearly enough anymore when it comes to investing in rare coins. Compared to the Shield Nickel series, the Liberty Nickel spans two centuries, is nearly twice as long in terms of the number of years the coin was in production, and on average were better produced so that lengthy explanations about die characteristics and metal alloys do not cloud the issue or detract from the beauty of a strictly Gem Uncirculated coin.

The Liberty Nickel series includes coins dated 1883 and 1913. Both of which are the subject matter of colorful tales and mystery.

The legendary 1913 Liberty Nickel is known by many outside the hobby, as examples of this coin have sold for over $1 million by auctioneers like Superior Galleries and Bowers & Merena Galleries. Such publicity only enhances the average collector's/investor's appreciation for the entire series.

The less well known saga of the 1883 Liberty Nickel involves the so-called Racketeer Nickel. The numismatic relevance of this drama can help establish the fledgling value investor to feel that he or she is a part of something bigger and more vast than just coin collecting when he learns of the events surrounding the design changes to this series of coins. Every dealer and most long time collectors know the story where the "V" on the reverse of the coin was all that indicated the value of the coin at five-cents. Unscrupulous hucksters, preying on the

PUBLISHER Shane Downing
CIRCULATION & ADVERTISING Betty Morris

The **CDN MONTHLY SUPPLEMENT** is a supplement to the weekly **COIN DEALER Newsletter** (*Greysheet*); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified) but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The **CDN** may not change Bid just because a dealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly **CERTIFIED COIN DEALER Newsletter** (*Bluesheet*) provides Bids for certified coins only

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Periodicals postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly **Coin Dealer Newsletter** (*Greysheet*) is: $54.00 for six months, $98.00 for one year and $162.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

unwary; Gold plated such coins and passed them off as Five Dollar Gold coins. One such huckster – a deaf mute – nonchalantly tendered one of these Gold plated coins and received $4.95 in change. Because he didn't ask for the change he could not be prosecuted for his actions. In any event, situations like this and many others no doubt, led to the Mint adding the word CENTS to the die and there is a production in 1883 of five-cent coins both with and without the word CENTS on the actual coin.

Neither variation of 1883 coinage is rare though the **with** CENTS variety is certainly the scarcer of the two. Continuing the theme of undervalued rarities there are numerous dates that fit the criteria. The 1885, 1886, 1890, 1895, 1896, and 1897 all have a PCGS population of less than 30 coins in Mint State 65. The 1886, of which PCGS has graded a mere 17 coins in MS-65 is valued well below $5,000. Compare such a population and the coins value with coins from the Barber series of coinage or a host of 20th century coinage and one sees just how **overlooked** is this series.

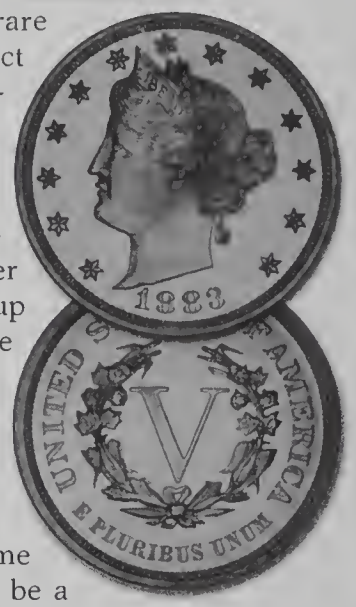

On a lower scale of economy, the 1890 which has a population of just 25 coins is valued at $1,275. Other "favorite" dates in terms of their being undervalued are the 1895 and 1896.

Nearly the entire run of dates from the 1880s and 1890s may be considered scarce to rare excluding the 1883 coinage. From the production of 20th century coinage, the 1907, 1908, 1909, and 1910 emerge as more difficult to locate in Gem condition than the coinage from 1900 to 1906.

BABY BOOMER COINS

The notion of value investing is void of insight unless there is something against which these Nickel coins produced from 1866 to 1912 can be further compared. We have invented the terminology "Baby Boomer Coins" to describe that group of coinage. While we will not go so far as to say that these "Baby Boomer Coins" – which will be defined in a moment – are overvalued, suffice it to say that Liberty Nickels and Shield Nickels are certainly undervalued, perhaps even dramatically undervalued, by comparison.

As a baby boomer, I have always been fascinated by and paid attention to the collecting trends associated with the Baby Boomer Generation. As a Baby Boomer, my interest in coin collecting and numismatics rested with 20th century coinage. I started first by collecting Lincoln Cents (1909-present) followed by the Mercury Dimes (1916-1945) and then the Walking Liberty Half Dollars (1916-1947). Ironically I never got heavily involved in collecting Buffalo Nickels, but the general landscape of my collecting interests is quite clear. Also I believe it is similar to many other coin collectors from my generation.

Now while I maintained an interest in rare coins from youth into adulthood and in fact pursued dealing in rare coins as my profession and livelihood, not all Baby Boomers became coin dealers.

What is common to the Baby Boomers, however, is that upon returning to coin collecting after becoming prosperous in other areas of their lives, collecting interests pick up right where they left off. That is with the series of interest to the Baby Boomers in their youth – Lincoln Cents, Buffalo Nickels, Mercury Dimes, Standing Liberty Quarter Dollars, and Walking Liberty Half Dollars and so on.

With a great deal more disposable income and a much finer sense of what it takes to be a connoisseur, Baby Boomers have generated a fierce competition to acquire finest known examples of coins from their favorite series. The sale of a Mercury dime (not even an example of the much coveted 1916-D) for over $200,000 and numerous Buffalo Nickels reaching into the $100,000 range, there is no denying the strength or seriousness of this phenomenon.

However when one notes that an MS-65 1926-S Buffalo Nickel, of which PCGS has graded nine coins, selling for over $100,000 and a *CDN Monthly Supplement* Bid over $60,000, while an 1886 Liberty Nickel boasting a similarly small population *in one grade higher* selling in the neighborhood of $12,000, the term undervalued takes on added meaning.

Whether prices continue to increase for these so-called Baby Boomer coins or even if they plateau, it is our belief that many of the Baby Boomer Generation collectors will mature as numismatists. They will find more enduring and value oriented interests in other areas of U.S. coins.

Numismatically speaking, the Shield Nickel and Liberty Nickel also offer many byways unknown to the more modern coinage. As Nickel is a difficult metal to work in coinage production, the Shield Nickel series in particular abounds with overdates and repunched dates. Often such coins are sold for little or no premium because the varieties are unrecognized.

Introduce your "Baby Boomer" collectors to Nickel coinage of the United States. We look for a migration to this area of U.S. coins and we expect MS-65 and higher graded Liberty and Shield Nickels to advance greatly in price.

MS65 LIBERTY NICKELS

RARE GOLD

If you are a marketer of rare United States Gold coins and you do not receive my wholesale price list, you may be costing yourself money.

I'm one of the largest wholesalers of rare United States Gold coins in the world. I have over twenty years experience in wholesale gold coin sales.

Each week, I put out a "user-friendly" inventory list which contains over $1 million of choice, fairly priced rare U.S. Gold coins.

I specialize in PCGS and NGC graded U.S. Gold coins struck from 1795 to 1900 in Very Fine to Mint State grades.

Comprehensive support material is available. I can increase your sales and make it easier for you to sell rare U.S. Gold coins.

BUYING ALL BETTER DATE GOLD ESPECIALLY WANT THE FOLLOWING TWENTY DOLLAR GOLD PIECES

1850–1876 TWENTY DOLLAR AU 53 – MS 65
CARSON CITY 20 DOLLAR AU 53 – MS 63
ALL SLIGHTLY BETTER DATE 20 DOLLAR MS 62 OR BETTER

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60–Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS63–Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS64–Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65–Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.

MS67–Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

COUNTERFEIT COIN BULLETIN

An invaluable guide that warns of deceptive counterfeit and altered coins in the numismatic marketplace.

- Learn about dangerous fakes.
- Avoid costly mistakes.
- Ensure the integrity of your personal collection, museum cabinet or dealer inventory.

Loose-leaf, self-indexing bulletins (5 7/8" x 8 1/4") issued 3 times per year.

Each installment includes a minimum of 8 reports, plus an informative feature.

$60 per year

for ANA members; $100 for non-members. Non-U.S. members & subscribers please add $15.

a publication of the American Numismatic Association (ANA) and the International Association of Professional Numismatists (IAPN)

User-friendly, numismatic information delivered right to your door.
Subscription includes a handy, three-ring binder in which to organize your bulletins.

To order, contact:
